Gary,

I sent the correct DLN, and received the responses.

For the initial try, since there was no pointer with DLN 'A7685517' in AI , shouldn't the error be "REQUESTED RECORD NOT FOUND" ?

ID	Clear Name and Identifier	Implementation Name	SOR Action on Data
CD04.LKU P.SB. 0100	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha-numeric Size=25	SOR attempts to locate the r using the DDLNUM contain message. If the record is no error message.

Gary,
For ACD Code B27, you need the withdrawal.

For the 1st conviction, the Withdrawal should be no less than 180 days or more than 1 year:

Table 15. Violating Out-of-Servi

This email comes from an external source, so remember, Think Before You Click!
Gary,

I sent the correct DLN, and received the responses.

For the initial try, since there was no pointer with DLN 'A7685517' in AI , shouldn't the error be "REQUESTED RECORD NOT FOUND" ?

ID	Clear Name and Identifier	Implementation Name	SOR Action on Data
CD04.LKUP.SB.0100	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha-numeric Size=25	SOR attempts to locate the r using the DDLNUM contain message. If the record is no error message.

Gary,
For ACD Code B27, you need the withdrawal.

For the 1st conviction, the Withdrawal should be no less than 180 days or more than 1 year:

Table 15. Violating Out-of-Servi

FMCSR	FMCSR Description	ACD Code	
Violating Out-of-Serv			
1st conviction = no less than 180 days or more than 1 yr 1st conviction w/hazmat or in vehicle designed to transport 16+ passenger = no less thar 2nd conviction w/in 10 yr = no less than 2 yrs or more than 5 yrs 2nd conviction w/hazmat or in vehicle designed to transport 16+ passenger = no less tha 3rd conviction w/in 10 yr (no distinction for hazmat or number of passengers) = no less *NOTEs: disqualification period must be in addition to any other previous period of dis* *Only applicable when offense occurred in a CMV)* For 1st conviction – ACD Code of withdrawal is same as ACD Code of conviction; Retention Period: 15 years from the conviction date or for as long as any resulting with

Gary,
For ACD Code B27, you need the withdrawal.

For the 1st conviction, the Withdrawal should be no less than 180 days or more than 1 year:

Table 15. Violating Out-of-Servi

FMCSR	FMCSR Description	ACD Code	
Violating Out-of-Serv			
1st conviction = no less than 180 days or more than 1 yr 1st conviction w/hazmat or in vehicle designed to transport 16+ passenger = no less thar 2nd conviction w/in 10 yr = no less than 2 yrs or more than 5 yrs 2nd conviction w/hazmat or in vehicle designed to transport 16+ passenger = no less tha 3rd conviction w/in 10 yr (no distinction for hazmat or number of passengers) = no less *NOTEs: disqualification period must be in addition to any other previous period of dis* *Only applicable when offense occurred in a CMV)* For 1st conviction – ACD Code of withdrawal is same as ACD Code of conviction; Retention Period: 15 years from the conviction date or for as long as any resulting with

Gary,

I sent the correct DLN, and received the responses.

For the initial try, since there was no pointer with DLN 'A7685517' in AI , shouldn't the error be "REQUESTED RECORD NOT FOUND" ?

ID	Clear Name and Identifier	Implementation Name	SOR Action on Data
CD04.LKUP.SB.0100	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha-numeric Size=25	SOR attempts to locate the r using the DDLNUM contain message. If the record is no error message.

Gary,

Since these are two different convictions (different Conviction date, Report ID's etc.,). these should be linked to new Withdrawal.

Thanks,
Asma

From: Gary Tancik [mailto:Gtancik@resdat.com]

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver N

Since the conviction was another B27 for a different conviction date, do you expect a new linked withdrawal or would this potentially be the same withdrawal that links both B27 convictions?

Yes, I would have expected an error response to be generated. Apparently there is some level of message parsing for logging purposes prior to request processing. I will pursue this as a fix.

Gary,

I sent the correct DLN, and received the responses.

For the initial try, since there was no pointer with DLN 'A7685517' in AI , shouldn't the error be "REQUESTED RECORD NOT FOUND" ?

From: Gary Tancik [mailto:Gtancik@resdat.com]

Gary,

For ACD Code B27, you need the withdrawal.

For the 1st conviction, the Withdrawal should be no less than 180 days or more than 1 year:

Thanks,

Asma

Gary,

Since these are two different convictions (different Conviction date, Report ID's etc.,). these should be linked to new Withdrawal.

Thanks,
Asma

From: Gary Tancik [mailto:Gtancik@resdat.com]
Sent: Monday, August 7, 2017 1:57 PM

Gary,

I sent the correct DLN, and received the responses.

For the initial try, since there was no pointer with DLN 'A7685517' in AI , shouldn't the error be "REQUESTED RECORD NOT FOUND" ?

ID	Clear Name and Identifier	Implementation Name	SOR Action on Data
CD04.LKUP.SB.0100	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha-numeric Size=25	SOR attempts to locate the r using the DDLNUM contain message. If the record is no error message.

Gary,

I sent the correct DLN, and received the responses.

For the initial try, since there was no pointer with DLN 'A7685517' in AI , shouldn't the error be "REQUESTED RECORD NOT FOUND" ?

ID	Clear Name and Identifier	Implementation Name	SOR Action on Data
CD04.LKU P.SB. 0100	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha-numeric Size=25	SOR attempts to locate the r using the DDLNUM contain message. If the record is no error message.

Gary,
For ACD Code B27, you need the withdrawal.

For the 1st conviction, the Withdrawal should be no less than 180 days or more than 1 year:

Table 15. Violating Out-of-Servi

FMCSR	FMCSR Description	ACD Code	
Violating Out-of-Serv			
1st conviction = no less than 180 days or more than 1 yr 1st conviction w/hazmat or in vehicle designed to transport 16+ passenger = no less thar 2nd conviction w/in 10 yr = no less than 2 yrs or more than 5 yrs 2nd conviction w/hazmat or in vehicle designed to transport 16+ passenger = no less tha 3rd conviction w/in 10 yr (no distinction for hazmat or number of passengers) = no less *NOTEs: disqualification period must be in addition to any other previous period of dis* *Only applicable when offense occurred in a CMV)* For 1st conviction – ACD Code of withdrawal is same as ACD Code of conviction; Retention Period: 15 years from the conviction date or for as long as any resulting with

Gary,
For ACD Code B27, you need the withdrawal.

For the 1st conviction, the Withdrawal should be no less than 180 days or more than 1 year:

Table 15. Violating Out-of-Servi

FMCSR	FMCSR Description	ACD Code	
Violating Out-of-Serv			
1st conviction = no less than 180 days or more than 1 yr 1st conviction w/hazmat or in vehicle designed to transport 16+ passenger = no less thar 2nd conviction w/in 10 yr = no less than 2 yrs or more than 5 yrs 2nd conviction w/hazmat or in vehicle designed to transport 16+ passenger = no less tha 3rd conviction w/in 10 yr (no distinction for hazmat or number of passengers) = no less *NOTEs: disqualification period must be in addition to any other previous period of dis* *Only applicable when offense occurred in a CMV)* For 1st conviction – ACD Code of withdrawal is same as ACD Code of conviction; Retention Period: 15 years from the conviction date or for as long as any resulting with

Gary,

I sent the correct DLN, and received the responses.

For the initial try, since there was no pointer with DLN 'A7685517' in AI , shouldn't the error be "REQUESTED RECORD NOT FOUND" ?

ID	Clear Name and Identifier	Implementation Name	SOR Action on Data
CD04.LKUP.SB.0100	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha-numeric Size=25	SOR attempts to locate the r using the DDLNUM contain message. If the record is no error message.

Gary,
For ACD Code B27, you need the withdrawal.

For the 1st conviction, the Withdrawal should be no less than 180 days or more than 1 year:

Table 15. Violating Out-of-Servi

FMCSR	FMCSR Description	ACD Code	
Violating Out-of-Serv			
1st conviction = no less than 180 days or more than 1 yr 1st conviction w/hazmat or in vehicle designed to transport 16+ passenger = no less thar 2nd conviction w/in 10 yr = no less than 2 yrs or more than 5 yrs 2nd conviction w/hazmat or in vehicle designed to transport 16+ passenger = no less tha 3rd conviction w/in 10 yr (no distinction for hazmat or number of passengers) = no less *NOTEs: disqualification period must be in addition to any other previous period of dis* *Only applicable when offense occurred in a CMV)* For 1st conviction – ACD Code of withdrawal is same as ACD Code of conviction; Retention Period: 15 years from the conviction date or for as long as any resulting with

Gary,

I sent the correct DLN, and received the responses.

For the initial try, since there was no pointer with DLN 'A7685517' in AI , shouldn't the error be "REQUESTED RECORD NOT FOUND" ?

ID	Clear Name and Identifier	Implementation Name	SOR Action on Data
CD04.LKUP.SB.0100	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha-numeric Size=25	SOR attempts to locate the r using the DDLNUM contain message. If the record is no error message.

Gary,

I sent the correct DLN, and received the responses.

For the initial try, since there was no pointer with DLN 'A7685517' in AI , shouldn't the error be "REQUESTED RECORD NOT FOUND" ?

ID	Clear Name and Identifier	Implementation Name	SOR Action on Data
CD04.LKUP.SB.0100	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha-numeric Size=25	SOR attempts to locate the r using the DDLNUM contain message. If the record is no error message.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver N

Since the conviction was another B27 for a different conviction date, do you expect a new linked withdrawal or would this potentially be the same withdrawal that links both B27 convictions?

Gary,

I sent the correct DLN, and received the responses.

For the initial try, since there was no pointer with DLN 'A7685517' in AI , shouldn't the error be "REQUESTED RECORD NOT FOUND" ?

ID	Clear Name and Identifier	Implementation Name	SOR Action on Data
CD04.LKUP.SB.0100	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha-numeric Size=25	SOR attempts to locate the r using the DDLNUM contain message. If the record is no error message.

Gary,

I sent the correct DLN, and received the responses.

For the initial try, since there was no pointer with DLN 'A7685517' in AI , shouldn't the error be "REQUESTED RECORD NOT FOUND" ?

ID	Clear Name and Identifier	Implementation Name	SOR Action on Data
CD04.LKUP.SB.0100	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha-numeric Size=25	SOR attempts to locate the r using the DDLNUM contain message. If the record is no error message.

Gary,

I see three withdrawals on H5 , one for B19 and two for B27.

The 2nd B27 has no Conviction or Linkages on the H3 and H7 messages respectively.

Can you please look…

Thanks,
Asma

Gary,

I sent the correct DLN, and received the responses.

For the initial try, since there was no pointer with DLN 'A7685517' in AI , shouldn't the error be "REQUESTED RECORD NOT FOUND" ?

ID	Clear Name and Identifier	Implementation Name	SOR Action on Data
CD04.LKUP.SB.0100	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha-numeric Size=25	SOR attempts to locate the r using the DDLNUM contain message. If the record is no error message.

Gary,
For ACD Code B27, you need the withdrawal.

For the 1st conviction, the Withdrawal should be no less than 180 days or more than 1 year:

Table 15. Violating Out-of-Servi

FMCSR	FMCSR Description	ACD Code	
Violating Out-of-Serv

Subject: AAMVA Training for CDLIS Reports

Good afternoon,

It's almost time for training again! The AAMVA Systems Training aims to develop education, training and learning opportunities that meet the needs of AAMVA's membership in the use of all the systems and procedures to ensure commercial driver safety and compliance with Federal regulations.

Below are the AAMVA training courses that focus on how to use CDLIS Reports. The following five courses are available:

August 28th CDLIS Reports- Timeliness & Accuracy Workbook: Timeliness (intermediate) - In depth look at the CDLIS Timeliness & Accuracy Summary and Detail Reports. The session reviews the timeliness tabs in the workbook and emphasizes how these reports can be used to get bad drivers off the road to ultimately save lives.
August 29th CDLIS Reports- Timeliness & Accuracy Workbook: Data Quality (intermediate) - In depth look at the CDLIS Timeliness & Accuracy Summary and Detail Reports. The session reviews the data quality tabs in the workbook and emphasizes how these reports can be used to get bad drivers off the road to ultimately save lives.
August 30th CDLIS Reports- CD90.4.1 OOST as SOR (advanced) - A very detailed session that will demonstrate how to use the 90.4.1 report as the SOR to reduce the number of missing convictions and to avoid improperly applying withdrawals (ensure the driver history is maintained correctly).
September 6th CDLIS Reports- Identifying Potential Issues with SDLA Inquiries Check, Medical Recordkeeping, Disqualifying Convictions Received and Disqualifying Convictions Rejected Reports (advanced) - In depth look at how Jurisdictions can use the CDLIS Reports to identify issues, resolve issues and ultimately become green. This course reviews the CD90.5.3 SDLA Inquiries Check Report, CD90.5.6 Medical Recordkeeping Report, CD90.4.3 Disqualifying Convictions Received and CD90.4.4 Disqualifying Convictions Rejected Reports in great detail.
September 7th CDLIS Reports- Identifying Potential Issues with Quarterly Open Problem Ticket, MPR Summary, Frequent Inquiry and additional CDLIS Reports (advanced) - In depth look at how Jurisdictions can use the CDLIS Reports to identify issues, resolve issues and ultimately become green. This course reviews the Quarterly Problem Ticket Report, CD90.7.2 MPR Summary Report and CD90.3.7 Frequent Inquiry Report in great detail. The course also reviews additional CDLIS Reports that are useful to Jurisdictions when trying to identify issues.

NOTE: All courses are **free** *for AAMVA members*.

Click the following link to view the course catalogue and to register or enroll in a session: http://aamva.intevista.com. If you experience trouble enrolling, or if you would like more information on any of the courses, please send an email to trainer@aamva.org.

Thanks,

Jessie Rogers|Senior Operations Analyst|AAMVA|4401 Wilson Blvd., Suite 700 Arlington, Va. 22203|703.908.8264|jrogers@aamva.org|www.aamva.org

Gary,

I see three withdrawals on H5 , one for B19 and two for B27.

The 2nd B27 has no Conviction or Linkages on the H3 and H7 messages respectively.

Can you please look…

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver N

Since the conviction was another B27 for a different conviction date, do you expect a new linked withdrawal or would this potentially be the same withdrawal that links both B27 convictions?

Gary,

I sent the correct DLN, and received the responses.

For the initial try, since there was no pointer with DLN 'A7685517' in AI , shouldn't the error be "REQUESTED RECORD NOT FOUND" ?

ID	Clear Name and Identifier	Implementation Name	SOR Action on Data
CD04.LKU P.SB. 0100	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha-numeric Size=25	SOR attempts to locate the r using the DDLNUM contain message. If the record is no error message.

Gary,
For ACD Code B27, you need the withdrawal.

For the 1st conviction, the Withdrawal should be no less than 180 days or more than 1 year:

Table 15. Violating Out-of-Servi

FMCSR	FMCSR Description	ACD Code	
	Violating Out-of-Serv		
	1st conviction = no less than 180 days or more than 1 yr 1st conviction w/hazmat or in vehicle designed to transport 16+ passenger = no less thar 2nd conviction w/in 10 yr = no less than 2 yrs or more than 5 yrs 2nd conviction w/hazmat or in vehicle designed to transport 16+ passenger = no less tha 3rd conviction w/in 10 yr (no distinction for hazmat or number of passengers) = no less *NOTEs: disqualification period must be in addition to any other previous period of dis* *Only applicable when offense occurred in a CMV)* For 1st conviction – ACD Code of withdrawal is same as ACD Code of conviction; Retention Period: 15 years from the conviction date or for as long as any resulting with

Gary,

I sent the correct DLN, and received the responses.

For the initial try, since there was no pointer with DLN 'A7685517' in AI , shouldn't the error be "REQUESTED RECORD NOT FOUND" ?

ID	Clear Name and Identifier	Implementation Name	SOR Action on Data
CD04.LKUP.SB.0100	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha-numeric Size=25	SOR attempts to locate the r using the DDLNUM contain message. If the record is no error message.

Gary,

I see HA message going to AI, but there was no response back:

1708071235270004	37	HF	AI	XX	P3
1708071235270001	37	HA	XX	P3	P3

Can you please look.

Thanks,
Asma

Gary,

I sent the correct DLN, and received the responses.

For the initial try, since there was no pointer with DLN 'A7685517' in AI , shouldn't the error be "REQUESTED RECORD NOT FOUND" ?

ID	Clear Name and Identifier	Implementation Name	SOR Action on Data
CD04.LKUP.SB.0100	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha-numeric Size=25	SOR attempts to locate the r using the DDLNUM contain message. If the record is no error message.

Gary,

I sent the correct DLN, and received the responses.

For the initial try, since there was no pointer with DLN 'A7685517' in AI , shouldn't the error be "REQUESTED RECORD NOT FOUND" ?

ID	Clear Name and Identifier	Implementation Name	SOR Action on Data
CD04.LKUP.SB.0100	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha-numeric Size=25	SOR attempts to locate the r using the DDLNUM contain message. If the record is no error message.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver N

I am investigating the latency.

Am I required to create a linked withdrawal for the reported B27 conviction? If not, I am ready for N3.

Gary,

Since the responses came after 50 secs, the test case at my end timed out, can you look why there was a delay?

Can I send # N3?

Gary,

Since these are two different convictions (different Conviction date, Report ID's etc.,). these should be linked to new Withdrawal.

Thanks,
Asma

Since the conviction was another B27 for a different conviction date, do you expect a new linked withdrawal or would this potentially be the same withdrawal that links both B27 convictions?

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver N

Yes, I would have expected an error response to be generated. Apparently there is some level of message parsing for logging purposes prior to request processing. I will pursue this as a fix.

Gary,

I sent the correct DLN, and received the responses.

For the initial try, since there was no pointer with DLN 'A7685517' in AI , shouldn't the error be "REQUESTED RECORD NOT FOUND" ?

ID	Clear Name and Identifier	Implementation Name	SOR Action on Data
CD04.LKUP.SB.0100	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha-numeric Size=25	SOR attempts to locate the r using the DDLNUM contain message. If the record is no error message.

Gary,

I'm not receiving the responses for # N5.

Can you please look…

Thanks,
Asma

Gary,

B19 is fine too, since it's an Out Of Service Order .

Sending # N3.

Thanks,
Asma

From: Gary Tancik [mailto:Gtancik@resdat.com]

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver N

I've created a linked withdrawal. However, I noticed the conviction reported in N2 was for ACD B19 and not B27. I'm ready for N3 unless you think this is a problem.

Gary,
For ACD Code B27, you need the withdrawal.

For the 1st conviction, the Withdrawal should be no less than 180 days or more than 1 year:

Table 15. Violating Out-of-Servi

FMCSR	FMCSR Description	ACD Code	
Violating Out-of-Serv			
1st conviction = no less than 180 days or more than 1 yr 1st conviction w/hazmat or in vehicle designed to transport 16+ passenger = no less thar 2nd conviction w/in 10 yr = no less than 2 yrs or more than 5 yrs 2nd conviction w/hazmat or in vehicle designed to transport 16+ passenger = no less tha 3rd conviction w/in 10 yr (no distinction for hazmat or number of passengers) = no less *NOTEs: disqualification period must be in addition to any other previous period of dis* *Only applicable when offense occurred in a CMV)* For 1st conviction – ACD Code of withdrawal is same as ACD Code of conviction; Retention Period: 15 years from the conviction date or for as long as any resulting with

Gary,

CSOR looks good.

That completes Driver N.

Can we continue tomorrow morning?

Thanks,
Asma

Gary,

I see three withdrawals on H5 , one for B19 and two for B27.

The 2nd B27 has no Conviction or Linkages on the H3 and H7 messages respectively.

Can you please look…

Thanks,
Asma

Gary,

Since these are two different convictions (different Conviction date, Report ID's etc.,). these should be linked to new Withdrawal.

Thanks,
Asma

From: Gary Tancik [mailto:Gtancik@resdat.com]
Sent: Monday, August 7, 2017 1:57 PM
To: Syeda, Asma <ASyeda@aamva.org>

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver N

Since the conviction was another B27 for a different conviction date, do you expect a new linked withdrawal or would this potentially be the same withdrawal that links both B27 convictions?

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver N

Yes, I would have expected an error response to be generated. Apparently there is some level of message parsing for logging purposes prior to request processing. I will pursue this as a fix.

Gary,

I sent the correct DLN, and received the responses.

For the initial try, since there was no pointer with DLN 'A7685517' in AI , shouldn't the error be "REQUESTED RECORD NOT FOUND" ?

ID	Clear Name and Identifier	Implementation Name	SOR Action on Data
CD04.LKUP.SB.0100	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha-numeric Size=25	SOR attempts to locate the r using the DDLNUM contain message. If the record is no error message.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver N

Looking at the SB requests, there appears to be a problem with the driver's license number: AIA7685517

We internally logged this inbound message as being invalid.

Gary,
For ACD Code B27, you need the withdrawal.

For the 1st conviction, the Withdrawal should be no less than 180 days or more than 1 year:

Table 15. Violating Out-of-Servi

FMCSR	FMCSR Description	ACD Code	
Violating Out-of-Serv			
1st conviction = no less than 180 days or more than 1 yr 1st conviction w/hazmat or in vehicle designed to transport 16+ passenger = no less thar 2nd conviction w/in 10 yr = no less than 2 yrs or more than 5 yrs 2nd conviction w/hazmat or in vehicle designed to transport 16+ passenger = no less tha 3rd conviction w/in 10 yr (no distinction for hazmat or number of passengers) = no less *NOTEs: disqualification period must be in addition to any other previous period of dis* *Only applicable when offense occurred in a CMV)* For 1st conviction – ACD Code of withdrawal is same as ACD Code of conviction; Retention Period: 15 years from the conviction date or for as long as any resulting with

Subject: Question about - AK (AI) SSOLV Capability end to end Testing Test Case 009

Hello Nadeem,

I have a question regarding 'AK (AI) SSOLV Capability end to end Testing Test Case 009'.

The date of birth for this test is 08/22/07. Would this be 08/22/1907 or 08/22/2007?

If it is 08/22/2007, we don't have any license processing available for a 9 year old person, so we would not be able to complete this test. I can send you our validation errors if you like.

Thank you.

AAMVA AIC 2017 - New Guest Speaker Announced

The 2017 AAMVA Annual International Conference is just around the corner! Join us in San Francisco, August 21-23, for AAMVA's premier event for jurisdictions, industry, and federal partners to come together to share experiences and learn. Register today for the 2017 AAMVA Annual International Conference featuring:

An Industry Perspective on the Future of Dealers and Drivers
Sandy Schwartz, President, Cox Automotive
Wednesday, August 23 | Bayview AB, Bay Level
9:00 am - 10:00 am

Cox Automotive is a software and solutions provider to the auto industry and home to leading brands such as Manheim, Autotrader, Kelley Blue Book and Dealertrack. President Sandy Schwartz will share his views on the future of the industry and the impact on the motor vehicle community.

This Week's Webinars

NMVTIS Suspense Resolution for Online States (AMIE Version) - Part 2
Wednesday, August 9, 2017, 2:00 - 3:00 pm (ET)
NMVTIS has two third party transactions that involve updates between the central site and multiple states. Because the transactions involve multiple states and the central site, it is possible for a transaction to break down before it completes. Further activity against this title record is greatly restricted until the problem is resolved. This webinar provides instruction as to how to identify and resume suspended transactions. The intended audience for this webinar are NMVTIS Help Desk Personnel, Business Process Analyst and IT System Integrators.

New Jersey: New Parking Placards for Disabled Veterans and Purple Heart Recipients

New Jersey Motor Vehicle Commission (MVC) Chairman and Chief Administrator Raymond P. Martinez gathered with representatives from the New Jersey Department of Military and Veterans Affairs and local veterans groups at VFW Post 1333 in Asbury Park to announce the availability of new placards for disabled veterans and Purple Heart recipients which will exempt them from municipal parking meter fees. Read more here.

FEDERAL NEWS

FMCSA Announces Regulatory Guidance Concerning The Issuance Of Commercial Learner's Permits

The Federal Motor Carrier Safety Administration (FMCSA) announces regulatory guidance clarifying that State Driver Licensing Agencies (SDLAs) may agree to facilitate the commercial learner's permit (CLP) application process and to administer the commercial driver's license (CDL) general knowledge test to individuals who are not domiciled in the State. This guidance makes clear that SDLAs may accept applications for CLPs and administer the general knowledge test to individuals taking commercial motor vehicle driver training in that State, but who are not domiciled there, provided that: The SDLA administering the general knowledge test transmits the test results directly, securely, and electronically to the applicant's State of domicile; and the State of domicile agrees to accept the test results and issue the CLP. While this guidance is in answer to general knowledge testing as addressed in FMCSA regulations, the Administration notes that this regulatory guidance is consistent with the Agency's October 13, 2016, final rule which amended the CDL regulations to ease the transition of military personnel into civilian careers driving commercial motor vehicles (CMVs). The regulatory guidance is applicable August 3, 2017. The guidance expires August 3, 2022.

FMCSA Issues Rulemaking Procedures Update

The Federal Motor Carrier Safety Administration (FMCSA) has issued a Rulemaking Procedures Update. The Fixing America's Surface Transportation (FAST) Act requires FMCSA to address its rulemaking and petitions procedures. Specifically, section 5202 of the Act provides requirements for the Agency to follow regarding the development of proposed rulemakings. Section 5204 of the FAST Act also directs the Agency to be more transparent to the public regarding how FMCSA prioritizes and defines petitions.

DOT Solicits Infrastructure for Rebuilding America (INFRA) Grant Program Applications

The Department of Transportation solicits applications for the Infrastructure for Rebuilding America (INFRA) program grants under the program's FY 2017 and FY 2018 funding. The INFRA program will make approximately $1.5 billion available to projects that are in line with the Administration's principles to help rebuild America's infrastructure. In addition to providing direct federal funding, the INFRA program aims to increase the total investment by state, local, and private partners. INFRA advances the pre-existing Nationally Significant Freight and Highway Projects (NSFHP) grant program established in the FAST Act of 2015 and utilizes updated criteria to evaluate projects to align them with national and regional economic vitality goals and to leverage additional non-federal funding. The new program will increase the impact of projects by leveraging capital and allowing innovation in the project delivery and permitting processes, including public-private partnerships. Applications may be submitted through the Grants.gov portal and will be accepted through November 2, 2017.

States Urged to Utilize Updated Traffic Crash Guideline for Better Data Collection and Reporting

With traffic fatalities on the rise, guidance on how to collect high-quality crash data becomes ever more important. Developed cooperatively by the Governors Highway Safety Association (GHSA) and the National Highway Traffic Safety Administration (NHTSA), the Model Minimum Uniform Crash Criteria (MMUCC) 5th Edition guideline has been updated to reflect the latest behavioral and technological changes impacting vehicles, drivers, and front-line data collectors. The voluntary MMUCC guideline identifies motor vehicle crash data elements and attributes that states are encouraged to collect and include in their crash data systems. It encourages greater uniformity and common definitions for vehicle crash data to make it easier to share and compare data at the local, state and national levels. This most recent update streamlines on-site data collection, reorganizing the guideline into context-specific modules related to the type of crash and allowing more data to be derived from the integrated systems many states now use. Read more here.

Older Novice Driver Crashes in New Jersey: Informing the Need for Extending Graduated Driver Licensing Restrictions

The AAA Foundation has released a report that examines how crashes over the initial four years of licensure differ for novice drivers licensed at different ages. This research was conducted to determine whether there is epidemiologic evidence to support adoption of extended-age graduated driver licensing policies, particularly passenger and nighttime restrictions. Read more here.

Connected and Autonomous Vehicles – Transportation Research Record

TRB's Transportation Research Record: Journal of the Transportation Research Board, No. 2625, includes 7 papers that explore information related to connected and automated vehicles, including:

- Analysis of the Effects of Connected–Automated Vehicle Technologies on Travel Demand
- Driving Mode Decision Making for Intelligent Vehicles in Stressful Traffic Events
- Lane-Changing Feedback Control for Efficient Lane Assignment at Motorway Bottlenecks
- Multiobjective Optimization Framework for Cooperative Adaptive Cruise Control Vehicles in the Automated Vehicle Platooning Environment
- Method for Gauging Usage Opportunities for Partially Automated Vehicles with Application to Public Travel Survey Data Sets
- Risk Analysis of Autonomous Vehicles in Mixed Traffic Streams
- Assessing Public Acceptance of Connected Vehicle Systems in a New Scheme of Usage-Based Insurance

An Industry Perspective on the Future of Dealers and Drivers
Sandy Schwartz, President, Cox Automotive
Wednesday, August 23 | Bayview AB, Bay Level
9:00 am - 10:00 am

Cox Automotive is a software and solutions provider to the auto industry and home to leading brands such as Manheim, Autotrader, Kelley Blue Book and Dealertrack. President Sandy Schwartz will share his views on the future of the industry and the impact on the motor vehicle community.

This Week's Webinars

NMVTIS Suspense Resolution for Online States (AMIE Version) - Part 2
Wednesday, August 9, 2017, 2:00 - 3:00 pm (ET)
NMVTIS has two third party transactions that involve updates between the central site and multiple states. Because the transactions involve multiple states and the central site, it is possible for a transaction to break down before it completes. Further activity against this title record is greatly restricted until the problem is resolved. This webinar provides instruction as to how to identify and resume suspended transactions. The intended audience for this webinar are NMVTIS Help Desk Personnel, Business Process Analyst and IT System Integrators.

New Jersey: New Parking Placards for Disabled Veterans and Purple Heart Recipients

New Jersey Motor Vehicle Commission (MVC) Chairman and Chief Administrator Raymond P. Martinez gathered with representatives from the New Jersey Department of Military and Veterans Affairs and local veterans groups at VFW Post 1333 in Asbury Park to announce the availability of new placards for disabled veterans and Purple Heart recipients which will exempt them from municipal parking meter fees. Read more here.

FEDERAL NEWS

FMCSA Announces Regulatory Guidance Concerning The Issuance Of Commercial Learner's Permits

The Federal Motor Carrier Safety Administration (FMCSA) announces regulatory guidance clarifying that State Driver Licensing Agencies (SDLAs) may agree to facilitate the commercial learner's permit (CLP) application process and to administer the commercial driver's license (CDL) general knowledge test to individuals who are not domiciled in the State. This guidance makes clear that SDLAs may accept applications for CLPs and administer the general knowledge test to individuals taking commercial motor vehicle driver training in that State, but who are not domiciled there, provided that: The SDLA administering the general knowledge test transmits the test results directly, securely, and electronically to the applicant's State of domicile; and the State of domicile agrees to accept the test results and issue the CLP. While this guidance is in answer to general knowledge testing as addressed in FMCSA regulations, the Administration notes that this regulatory guidance is consistent with the Agency's October 13, 2016, final rule which amended the CDL regulations to ease the transition of military personnel into civilian careers driving commercial motor vehicles (CMVs). The regulatory guidance is applicable August 3, 2017. The guidance expires August 3, 2022.

FMCSA Issues Rulemaking Procedures Update

The Federal Motor Carrier Safety Administration (FMCSA) has issued a Rulemaking Procedures Update. The Fixing America's Surface Transportation (FAST) Act requires FMCSA to address its rulemaking and petitions procedures. Specifically, section 5202 of the Act provides requirements for the Agency to follow regarding the development of proposed rulemakings. Section 5204 of the FAST Act also directs the Agency to be more transparent to the public regarding how FMCSA prioritizes and defines petitions.

DOT Solicits Infrastructure for Rebuilding America (INFRA) Grant Program Applications

The Department of Transportation solicits applications for the Infrastructure for Rebuilding America (INFRA) program grants under the program's FY 2017 and FY 2018 funding. The INFRA program will make approximately $1.5 billion available to projects that are in line with the Administration's principles to help rebuild America's infrastructure. In addition to providing direct federal funding, the INFRA program aims to increase the total investment by state, local, and private partners. INFRA advances the pre-existing Nationally Significant Freight and Highway Projects (NSFHP) grant program established in the FAST Act of 2015 and utilizes updated criteria to evaluate projects to align them with national and regional economic vitality goals and to leverage additional non-federal funding. The new program will increase the impact of projects by leveraging capital and allowing innovation in the project delivery and permitting processes, including public-private partnerships. Applications may be submitted through the Grants.gov portal and will be accepted through November 2, 2017.

States Urged to Utilize Updated Traffic Crash Guideline for Better Data Collection and Reporting

With traffic fatalities on the rise, guidance on how to collect high-quality crash data becomes ever more important. Developed cooperatively by the Governors Highway Safety Association (GHSA) and the National Highway Traffic Safety Administration (NHTSA), the Model Minimum Uniform Crash Criteria (MMUCC) 5th Edition guideline has been updated to reflect the latest behavioral and technological changes impacting vehicles, drivers, and front-line data collectors. The voluntary MMUCC guideline identifies motor vehicle crash data elements and attributes that states are encouraged to collect and include in their crash data systems. It encourages greater uniformity and common definitions for vehicle crash data to make it easier to share and compare data at the local, state and national levels. This most recent update streamlines on-site data collection, reorganizing the guideline into context-specific modules related to the type of crash and allowing more data to be derived from the integrated systems many states now use. Read more here.

Older Novice Driver Crashes in New Jersey: Informing the Need for Extending Graduated Driver Licensing Restrictions

The AAA Foundation has released a report that examines how crashes over the initial four years of licensure differ for novice drivers licensed at different ages. This research was conducted to determine whether there is epidemiologic evidence to support adoption of extended-age graduated driver licensing policies, particularly passenger and nighttime restrictions. Read more here.

Connected and Autonomous Vehicles – Transportation Research Record

AAMVA AIC 2017 - New Guest Speaker Announced

The 2017 AAMVA Annual International Conference is just around the corner! Join us in San Francisco, August 21-23, for AAMVA's premier event for jurisdictions, industry, and federal partners to come together to share experiences and learn. Register today for the 2017 AAMVA Annual International Conference featuring:

An Industry Perspective on the Future of Dealers and Drivers
Sandy Schwartz, President, Cox Automotive
Wednesday, August 23 | Bayview AB, Bay Level
9:00 am - 10:00 am

Cox Automotive is a software and solutions provider to the auto industry and home to leading brands such as Manheim, Autotrader, Kelley Blue Book and Dealertrack. President Sandy Schwartz will share his views on the future of the industry and the impact on the motor vehicle community.

This Week's Webinars

NMVTIS Suspense Resolution for Online States (AMIE Version) - Part 2
Wednesday, August 9, 2017, 2:00 - 3:00 pm (ET)
NMVTIS has two third party transactions that involve updates between the central site and multiple states. Because the transactions involve multiple states and the central site, it is possible for a transaction to break down before it completes. Further activity against this title record is greatly restricted until the problem is resolved. This webinar provides instruction as to how to identify and resume suspended transactions. The intended audience for this webinar are NMVTIS Help Desk Personnel, Business Process Analyst and IT System Integrators.

New Jersey: New Parking Placards for Disabled Veterans and Purple Heart Recipients

New Jersey Motor Vehicle Commission (MVC) Chairman and Chief Administrator Raymond P. Martinez gathered with representatives from the New Jersey Department of Military and Veterans Affairs and local veterans groups at VFW Post 1333 in Asbury Park to announce the availability of new placards for disabled veterans and Purple Heart recipients which will exempt them from municipal parking meter fees. Read more here.

FEDERAL NEWS

FMCSA Announces Regulatory Guidance Concerning The Issuance Of Commercial Learner's Permits

The Federal Motor Carrier Safety Administration (FMCSA) announces regulatory guidance clarifying that State Driver Licensing Agencies (SDLAs) may agree to facilitate the commercial learner's permit (CLP) application process and to administer the commercial driver's license (CDL) general knowledge test to individuals who are not domiciled in the State. This guidance makes clear that SDLAs may accept applications for CLPs and administer the general knowledge test to individuals taking commercial motor vehicle driver training in that State, but who are not domiciled there, provided that: The SDLA administering the general knowledge test transmits the test results directly, securely, and electronically to the applicant's State of domicile; and the State of domicile agrees to accept the test results and issue the CLP. While this guidance is in answer to general knowledge testing as addressed in FMCSA regulations, the Administration notes that this regulatory guidance is consistent with the Agency's October 13, 2016, final rule which amended the CDL regulations to ease the transition of military personnel into civilian careers driving commercial motor vehicles (CMVs). The regulatory guidance is applicable August 3, 2017. The guidance expires August 3, 2022.

FMCSA Issues Rulemaking Procedures Update

The Federal Motor Carrier Safety Administration (FMCSA) has issued a Rulemaking Procedures Update. The Fixing America's Surface Transportation (FAST) Act requires FMCSA to address its rulemaking and petitions procedures. Specifically, section 5202 of the Act provides requirements for the Agency to follow regarding the development of proposed rulemakings. Section 5204 of the FAST Act also directs the Agency to be more transparent to the public regarding how FMCSA prioritizes and defines petitions.

DOT Solicits Infrastructure for Rebuilding America (INFRA) Grant Program Applications

The Department of Transportation solicits applications for the Infrastructure for Rebuilding America (INFRA) program grants under the program's FY 2017 and FY 2018 funding. The INFRA program will make approximately $1.5 billion available to projects that are in line with the Administration's principles to help rebuild America's infrastructure. In addition to providing direct federal funding, the INFRA program aims to increase the total investment by state, local, and private partners. INFRA advances the pre-existing Nationally Significant Freight and Highway Projects (NSFHP) grant program established in the FAST Act of 2015 and utilizes updated criteria to evaluate projects to align them with national and regional economic vitality goals and to leverage additional non-federal funding. The new program will increase the impact of projects by leveraging capital and allowing innovation in the project delivery and permitting processes, including public-private partnerships. Applications may be submitted through the Grants.gov portal and will be accepted through November 2, 2017.

States Urged to Utilize Updated Traffic Crash Guideline for Better Data Collection and Reporting

With traffic fatalities on the rise, guidance on how to collect high-quality crash data becomes ever more important. Developed cooperatively by the Governors Highway Safety Association (GHSA) and the National Highway Traffic Safety Administration (NHTSA), the Model Minimum Uniform Crash Criteria (MMUCC) 5th Edition guideline has been updated to reflect the latest behavioral and technological changes impacting vehicles, drivers, and front-line data collectors. The voluntary MMUCC guideline identifies motor vehicle crash data elements and attributes that states are encouraged to collect and include in their crash data systems. It encourages greater uniformity and common definitions for vehicle crash data to make it easier to share and compare data at the local, state and national levels. This most recent update streamlines on-site data collection, reorganizing the guideline into context-specific modules related to the type of crash and allowing more data to be derived from the integrated systems many states now use. Read more here.

Older Novice Driver Crashes in New Jersey: Informing the Need for Extending Graduated Driver Licensing Restrictions

The AAA Foundation has released a report that examines how crashes over the initial four years of licensure differ for novice drivers licensed at different ages. This research was conducted to determine whether there is epidemiologic evidence to support adoption of extended-age graduated driver licensing policies, particularly passenger and nighttime restrictions. Read more here.

Connected and Autonomous Vehicles – Transportation Research Record

TRB's Transportation Research Record: Journal of the Transportation Research Board, No. 2625, includes 7 papers that explore information related to connected and automated vehicles, including:

- Analysis of the Effects of Connected–Automated Vehicle Technologies on Travel Demand
- Driving Mode Decision Making for Intelligent Vehicles in Stressful Traffic Events
- Lane-Changing Feedback Control for Efficient Lane Assignment at Motorway Bottlenecks
- Multiobjective Optimization Framework for Cooperative Adaptive Cruise Control Vehicles in the Automated Vehicle Platooning Environment
- Method for Gauging Usage Opportunities for Partially Automated Vehicles with Application to Public Travel Survey Data Sets
- Risk Analysis of Autonomous Vehicles in Mixed Traffic Streams
- Assessing Public Acceptance of Connected Vehicle Systems in a New Scheme of Usage-Based Insurance

AAMVA AIC 2017 - New Guest Speaker Announced

The 2017 AAMVA Annual International Conference is just around the corner! Join us in San Francisco, August 21-23, for AAMVA's premier event for jurisdictions, industry, and federal partners to come together to share experiences and learn. Register today for the 2017 AAMVA Annual International Conference featuring:

An Industry Perspective on the Future of Dealers and Drivers
Sandy Schwartz, President, Cox Automotive
Wednesday, August 23 | Bayview AB, Bay Level
9:00 am - 10:00 am

Cox Automotive is a software and solutions provider to the auto industry and home to leading brands such as Manheim, Autotrader, Kelley Blue Book and Dealertrack. President Sandy Schwartz will share his views on the future of the industry and the impact on the motor vehicle community.

This Week's Webinars

NMVTIS Suspense Resolution for Online States (AMIE Version) - Part 2
Wednesday, August 9, 2017, 2:00 - 3:00 pm (ET)
NMVTIS has two third party transactions that involve updates between the central site and multiple states. Because the transactions involve multiple states and the central site, it is possible for a transaction to break down before it completes. Further activity against this title record is greatly restricted until the problem is resolved. This webinar provides instruction as to how to identify and resume suspended transactions. The intended audience for this webinar are NMVTIS Help Desk Personnel, Business Process Analyst and IT System Integrators.

New Jersey: New Parking Placards for Disabled Veterans and Purple Heart Recipients

New Jersey Motor Vehicle Commission (MVC) Chairman and Chief Administrator Raymond P. Martinez gathered with representatives from the New Jersey Department of Military and Veterans Affairs and local veterans groups at VFW Post 1333 in Asbury Park to announce the availability of new placards for disabled veterans and Purple Heart recipients which will exempt them from municipal parking meter fees. Read more here.

FEDERAL NEWS

FMCSA Announces Regulatory Guidance Concerning The Issuance Of Commercial Learner's Permits

The Federal Motor Carrier Safety Administration (FMCSA) announces regulatory guidance clarifying that State Driver Licensing Agencies (SDLAs) may agree to facilitate the commercial learner's permit (CLP) application process and to administer the commercial driver's license (CDL) general knowledge test to individuals who are not domiciled in the State. This guidance makes clear that SDLAs may accept applications for CLPs and administer the general knowledge test to individuals taking commercial motor vehicle driver training in that State, but who are not domiciled there, provided that: The SDLA administering the general knowledge test transmits the test results directly, securely, and electronically to the applicant's State of domicile; and the State of domicile agrees to accept the test results and issue the CLP. While this guidance is in answer to general knowledge testing as addressed in FMCSA regulations, the Administration notes that this regulatory guidance is consistent with the Agency's October 13, 2016, final rule which amended the CDL regulations to ease the transition of military personnel into civilian careers driving commercial motor vehicles (CMVs). The regulatory guidance is applicable August 3, 2017. The guidance expires August 3, 2022.

FMCSA Issues Rulemaking Procedures Update

The Federal Motor Carrier Safety Administration (FMCSA) has issued a Rulemaking Procedures Update. The Fixing America's Surface Transportation (FAST) Act requires FMCSA to address its rulemaking and petitions procedures. Specifically, section 5202 of the Act provides requirements for the Agency to follow regarding the development of proposed rulemakings. Section 5204 of the FAST Act also directs the Agency to be more transparent to the public regarding how FMCSA prioritizes and defines petitions.

DOT Solicits Infrastructure for Rebuilding America (INFRA) Grant Program Applications

The Department of Transportation solicits applications for the Infrastructure for Rebuilding America (INFRA) program grants under the program's FY 2017 and FY 2018 funding. The INFRA program will make approximately $1.5 billion available to projects that are in line with the Administration's principles to help rebuild America's infrastructure. In addition to providing direct federal funding, the INFRA program aims to increase the total investment by state, local, and private partners. INFRA advances the pre-existing Nationally Significant Freight and Highway Projects (NSFHP) grant program established in the FAST Act of 2015 and utilizes updated criteria to evaluate projects to align them with national and regional economic vitality goals and to leverage additional non-federal funding. The new program will increase the impact of projects by leveraging capital and allowing innovation in the project delivery and permitting processes, including public-private partnerships. Applications may be submitted through the Grants.gov portal and will be accepted through November 2, 2017.

States Urged to Utilize Updated Traffic Crash Guideline for Better Data Collection and Reporting

With traffic fatalities on the rise, guidance on how to collect high-quality crash data becomes ever more important. Developed cooperatively by the Governors Highway Safety Association (GHSA) and the National Highway Traffic Safety Administration (NHTSA), the Model Minimum Uniform Crash Criteria (MMUCC) 5th Edition guideline has been updated to reflect the latest behavioral and technological changes impacting vehicles, drivers, and front-line data collectors. The voluntary MMUCC guideline identifies motor vehicle crash data elements and attributes that states are encouraged to collect and include in their crash data systems. It encourages greater uniformity and common definitions for vehicle crash data to make it easier to share and compare data at the local, state and national levels. This most recent update streamlines on-site data collection, reorganizing the guideline into context-specific modules related to the type of crash and allowing more data to be derived from the integrated systems many states now use. Read more here.

Older Novice Driver Crashes in New Jersey: Informing the Need for Extending Graduated Driver Licensing Restrictions

The AAA Foundation has released a report that examines how crashes over the initial four years of licensure differ for novice drivers licensed at different ages. This research was conducted to determine whether there is epidemiologic evidence to support adoption of extended-age graduated driver licensing policies, particularly passenger and nighttime restrictions. Read more here.

Connected and Autonomous Vehicles – Transportation Research Record

TRB's Transportation Research Record: Journal of the Transportation Research Board, No. 2625, includes 7 papers that explore information related to connected and automated vehicles, including:

- Analysis of the Effects of Connected–Automated Vehicle Technologies on Travel Demand
- Driving Mode Decision Making for Intelligent Vehicles in Stressful Traffic Events
- Lane-Changing Feedback Control for Efficient Lane Assignment at Motorway Bottlenecks
- Multiobjective Optimization Framework for Cooperative Adaptive Cruise Control Vehicles in the Automated Vehicle Platooning Environment
- Method for Gauging Usage Opportunities for Partially Automated Vehicles with Application to Public Travel Survey Data Sets
- Risk Analysis of Autonomous Vehicles in Mixed Traffic Streams
- Assessing Public Acceptance of Connected Vehicle Systems in a New Scheme of Usage-Based Insurance

Older Novice Driver Crashes in New Jersey: Informing the Need for Extending Graduated Driver Licensing Restrictions

The AAA Foundation has released a report that examines how crashes over the initial four years of licensure differ for novice drivers licensed at different ages. This research was conducted to determine whether there is epidemiologic evidence to support adoption of extended-age graduated driver licensing policies, particularly passenger and nighttime restrictions. Read more here.

Connected and Autonomous Vehicles – Transportation Research Record

TRB's Transportation Research Record: Journal of the Transportation Research Board, No. 2625, includes 7 papers that explore information related to connected and automated vehicles, including:

- Analysis of the Effects of Connected–Automated Vehicle Technologies on Travel Demand
- Driving Mode Decision Making for Intelligent Vehicles in Stressful Traffic Events
- Lane-Changing Feedback Control for Efficient Lane Assignment at Motorway Bottlenecks
- Multiobjective Optimization Framework for Cooperative Adaptive Cruise Control Vehicles in the Automated Vehicle Platooning Environment
- Method for Gauging Usage Opportunities for Partially Automated Vehicles with Application to Public Travel Survey Data Sets
- Risk Analysis of Autonomous Vehicles in Mixed Traffic Streams
- Assessing Public Acceptance of Connected Vehicle Systems in a New Scheme of Usage-Based Insurance

AAMVA AIC 2017 - New Guest Speaker Announced

The 2017 AAMVA Annual International Conference is just around the corner! Join us in San Francisco, August 21-23, for AAMVA's premier event for jurisdictions, industry, and federal partners to come together to share experiences and learn. Register today for the 2017 AAMVA Annual International Conference featuring:

An Industry Perspective on the Future of Dealers and Drivers
Sandy Schwartz, President, Cox Automotive
Wednesday, August 23 | Bayview AB, Bay Level
9:00 am - 10:00 am

Cox Automotive is a software and solutions provider to the auto industry and home to leading brands such as Manheim, Autotrader, Kelley Blue Book and Dealertrack. President Sandy Schwartz will share his views on the future of the industry and the impact on the motor vehicle community.

This Week's Webinars

NMVTIS Suspense Resolution for Online States (AMIE Version) - Part 2
Wednesday, August 9, 2017, 2:00 - 3:00 pm (ET)
NMVTIS has two third party transactions that involve updates between the central site and multiple states. Because the transactions involve multiple states and the central site, it is possible for a transaction to break down before it completes. Further activity against this title record is greatly restricted until the problem is resolved. This webinar provides instruction as to how to identify and resume suspended transactions. The intended audience for this webinar are NMVTIS Help Desk Personnel, Business Process Analyst and IT System Integrators.

New Jersey: New Parking Placards for Disabled Veterans and Purple Heart Recipients

New Jersey Motor Vehicle Commission (MVC) Chairman and Chief Administrator Raymond P. Martinez gathered with representatives from the New Jersey Department of Military and Veterans Affairs and local veterans groups at VFW Post 1333 in Asbury Park to announce the availability of new placards for disabled veterans and Purple Heart recipients which will exempt them from municipal parking meter fees. Read more here.

FEDERAL NEWS

FMCSA Announces Regulatory Guidance Concerning The Issuance Of Commercial Learner's Permits

The Federal Motor Carrier Safety Administration (FMCSA) announces regulatory guidance clarifying that State Driver Licensing Agencies (SDLAs) may agree to facilitate the commercial learner's permit (CLP) application process and to administer the commercial driver's license (CDL) general knowledge test to individuals who are not domiciled in the State. This guidance makes clear that SDLAs may accept applications for CLPs and administer the general knowledge test to individuals taking commercial motor vehicle driver training in that State, but who are not domiciled there, provided that: The SDLA administering the general knowledge test transmits the test results directly, securely, and electronically to the applicant's State of domicile; and the State of domicile agrees to accept the test results and issue the CLP. While this guidance is in answer to general knowledge testing as addressed in FMCSA regulations, the Administration notes that this regulatory guidance is consistent with the Agency's October 13, 2016, final rule which amended the CDL regulations to ease the transition of military personnel into civilian careers driving commercial motor vehicles (CMVs). The regulatory guidance is applicable August 3, 2017. The guidance expires August 3, 2022.

FMCSA Issues Rulemaking Procedures Update

The Federal Motor Carrier Safety Administration (FMCSA) has issued a Rulemaking Procedures Update. The Fixing America's Surface Transportation (FAST) Act requires FMCSA to address its rulemaking and petitions procedures. Specifically, section 5202 of the Act provides requirements for the Agency to follow regarding the development of proposed rulemakings. Section 5204 of the FAST Act also directs the Agency to be more transparent to the public regarding how FMCSA prioritizes and defines petitions.

DOT Solicits Infrastructure for Rebuilding America (INFRA) Grant Program Applications

The Department of Transportation solicits applications for the Infrastructure for Rebuilding America (INFRA) program grants under the program's FY 2017 and FY 2018 funding. The INFRA program will make approximately $1.5 billion available to projects that are in line with the Administration's principles to help rebuild America's infrastructure. In addition to providing direct federal funding, the INFRA program aims to increase the total investment by state, local, and private partners. INFRA advances the pre-existing Nationally Significant Freight and Highway Projects (NSFHP) grant program established in the FAST Act of 2015 and utilizes updated criteria to evaluate projects to align them with national and regional economic vitality goals and to leverage additional non-federal funding. The new program will increase the impact of projects by leveraging capital and allowing innovation in the project delivery and permitting processes, including public-private partnerships. Applications may be submitted through the Grants.gov portal and will be accepted through November 2, 2017.

States Urged to Utilize Updated Traffic Crash Guideline for Better Data Collection and Reporting

With traffic fatalities on the rise, guidance on how to collect high-quality crash data becomes ever more important. Developed cooperatively by the Governors Highway Safety Association (GHSA) and the National Highway Traffic Safety Administration (NHTSA), the Model Minimum Uniform Crash Criteria (MMUCC) 5th Edition guideline has been updated to reflect the latest behavioral and technological changes impacting vehicles, drivers, and front-line data collectors. The voluntary MMUCC guideline identifies motor vehicle crash data elements and attributes that states are encouraged to collect and include in their crash data systems. It encourages greater uniformity and common definitions for vehicle crash data to make it easier to share and compare data at the local, state and national levels. This most recent update streamlines on-site data collection, reorganizing the guideline into context-specific modules related to the type of crash and allowing more data to be derived from the integrated systems many states now use. Read more here.

States Urged to Utilize Updated Traffic Crash Guideline for Better Data Collection and Reporting

With traffic fatalities on the rise, guidance on how to collect high-quality crash data becomes ever more important. Developed cooperatively by the Governors Highway Safety Association (GHSA) and the National Highway Traffic Safety Administration (NHTSA), the Model Minimum Uniform Crash Criteria (MMUCC) 5th Edition guideline has been updated to reflect the latest behavioral and technological changes impacting vehicles, drivers, and front-line data collectors. The voluntary MMUCC guideline identifies motor vehicle crash data elements and attributes that states are encouraged to collect and include in their crash data systems. It encourages greater uniformity and common definitions for vehicle crash data to make it easier to share and compare data at the local, state and national levels. This most recent update streamlines on-site data collection, reorganizing the guideline into context-specific modules related to the type of crash and allowing more data to be derived from the integrated systems many states now use. Read more here.

Older Novice Driver Crashes in New Jersey: Informing the Need for Extending Graduated Driver Licensing Restrictions

The AAA Foundation has released a report that examines how crashes over the initial four years of licensure differ for novice drivers licensed at different ages. This research was conducted to determine whether there is epidemiologic evidence to support adoption of extended-age graduated driver licensing policies, particularly passenger and nighttime restrictions. Read more here.

Connected and Autonomous Vehicles – Transportation Research Record

TRB's Transportation Research Record: Journal of the Transportation Research Board, No. 2625, includes 7 papers that explore information related to connected and automated vehicles, including:

- Analysis of the Effects of Connected–Automated Vehicle Technologies on Travel Demand
- Driving Mode Decision Making for Intelligent Vehicles in Stressful Traffic Events
- Lane-Changing Feedback Control for Efficient Lane Assignment at Motorway Bottlenecks
- Multiobjective Optimization Framework for Cooperative Adaptive Cruise Control Vehicles in the Automated Vehicle Platooning Environment
- Method for Gauging Usage Opportunities for Partially Automated Vehicles with Application to Public Travel Survey Data Sets
- Risk Analysis of Autonomous Vehicles in Mixed Traffic Streams
- Assessing Public Acceptance of Connected Vehicle Systems in a New Scheme of Usage-Based Insurance

AAMVA AIC 2017 - New Guest Speaker Announced

The 2017 AAMVA Annual International Conference is just around the corner! Join us in San Francisco, August 21-23, for AAMVA's premier event for jurisdictions, industry, and federal partners to come together to share experiences and learn. Register today for the 2017 AAMVA Annual International Conference featuring:

An Industry Perspective on the Future of Dealers and Drivers
Sandy Schwartz, President, Cox Automotive
Wednesday, August 23 | Bayview AB, Bay Level
9:00 am - 10:00 am

Cox Automotive is a software and solutions provider to the auto industry and home to leading brands such as Manheim, Autotrader, Kelley Blue Book and Dealertrack. President Sandy Schwartz will share his views on the future of the industry and the impact on the motor vehicle community.

This Week's Webinars

NMVTIS Suspense Resolution for Online States (AMIE Version) - Part 2
Wednesday, August 9, 2017, 2:00 - 3:00 pm (ET)
NMVTIS has two third party transactions that involve updates between the central site and multiple states. Because the transactions involve multiple states and the central site, it is possible for a transaction to break down before it completes. Further activity against this title record is greatly restricted until the problem is resolved. This webinar provides instruction as to how to identify and resume suspended transactions. The intended audience for this webinar are NMVTIS Help Desk Personnel, Business Process Analyst and IT System Integrators.

New Jersey: New Parking Placards for Disabled Veterans and Purple Heart Recipients

New Jersey Motor Vehicle Commission (MVC) Chairman and Chief Administrator Raymond P. Martinez gathered with representatives from the New Jersey Department of Military and Veterans Affairs and local veterans groups at VFW Post 1333 in Asbury Park to announce the availability of new placards for disabled veterans and Purple Heart recipients which will exempt them from municipal parking meter fees. Read more here.

FEDERAL NEWS

FMCSA Announces Regulatory Guidance Concerning The Issuance Of Commercial Learner's Permits

The Federal Motor Carrier Safety Administration (FMCSA) announces regulatory guidance clarifying that State Driver Licensing Agencies (SDLAs) may agree to facilitate the commercial learner's permit (CLP) application process and to administer the commercial driver's license (CDL) general knowledge test to individuals who are not domiciled in the State. This guidance makes clear that SDLAs may accept applications for CLPs and administer the general knowledge test to individuals taking commercial motor vehicle driver training in that State, but who are not domiciled there, provided that: The SDLA administering the general knowledge test transmits the test results directly, securely, and electronically to the applicant's State of domicile; and the State of domicile agrees to accept the test results and issue the CLP. While this guidance is in answer to general knowledge testing as addressed in FMCSA regulations, the Administration notes that this regulatory guidance is consistent with the Agency's October 13, 2016, final rule which amended the CDL regulations to ease the transition of military personnel into civilian careers driving commercial motor vehicles (CMVs). The regulatory guidance is applicable August 3, 2017. The guidance expires August 3, 2022.

FMCSA Issues Rulemaking Procedures Update

The Federal Motor Carrier Safety Administration (FMCSA) has issued a Rulemaking Procedures Update. The Fixing America's Surface Transportation (FAST) Act requires FMCSA to address its rulemaking and petitions procedures. Specifically, section 5202 of the Act provides requirements for the Agency to follow regarding the development of proposed rulemakings. Section 5204 of the FAST Act also directs the Agency to be more transparent to the public regarding how FMCSA prioritizes and defines petitions.

DOT Solicits Infrastructure for Rebuilding America (INFRA) Grant Program Applications

The Department of Transportation solicits applications for the Infrastructure for Rebuilding America (INFRA) program grants under the program's FY 2017 and FY 2018 funding. The INFRA program will make approximately $1.5 billion available to projects that are in line with the Administration's principles to help rebuild America's infrastructure. In addition to providing direct federal funding, the INFRA program aims to increase the total investment by state, local, and private partners. INFRA advances the pre-existing Nationally Significant Freight and Highway Projects (NSFHP) grant program established in the FAST Act of 2015 and utilizes updated criteria to evaluate projects to align them with national and regional economic vitality goals and to leverage additional non-federal funding. The new program will increase the impact of projects by leveraging capital and allowing innovation in the project delivery and permitting processes, including public-private partnerships. Applications may be submitted through the Grants.gov portal and will be accepted through November 2, 2017.

States Urged to Utilize Updated Traffic Crash Guideline for Better Data Collection and Reporting

With traffic fatalities on the rise, guidance on how to collect high-quality crash data becomes ever more important. Developed cooperatively by the Governors Highway Safety Association (GHSA) and the National Highway Traffic Safety Administration (NHTSA), the Model Minimum Uniform Crash Criteria (MMUCC) 5th Edition guideline has been updated to reflect the latest behavioral and technological changes impacting vehicles, drivers, and front-line data collectors. The voluntary MMUCC guideline identifies motor vehicle crash data elements and attributes that states are encouraged to collect and include in their crash data systems. It encourages greater uniformity and common definitions for vehicle crash data to make it easier to share and compare data at the local, state and national levels. This most recent update streamlines on-site data collection, reorganizing the guideline into context-specific modules related to the type of crash and allowing more data to be derived from the integrated systems many states now use. Read more here.

Older Novice Driver Crashes in New Jersey: Informing the Need for Extending Graduated Driver Licensing Restrictions

The AAA Foundation has released a report that examines how crashes over the initial four years of licensure differ for novice drivers licensed at different ages. This research was conducted to determine whether there is epidemiologic evidence to support adoption of extended-age graduated driver licensing policies, particularly passenger and nighttime restrictions. Read more here.

Connected and Autonomous Vehicles – Transportation Research Record

TRB's Transportation Research Record: Journal of the Transportation Research Board, No. 2625, includes 7 papers that explore information related to connected and automated vehicles, including:

- Analysis of the Effects of Connected–Automated Vehicle Technologies on Travel Demand
- Driving Mode Decision Making for Intelligent Vehicles in Stressful Traffic Events
- Lane-Changing Feedback Control for Efficient Lane Assignment at Motorway Bottlenecks
- Multiobjective Optimization Framework for Cooperative Adaptive Cruise Control Vehicles in the Automated Vehicle Platooning Environment
- Method for Gauging Usage Opportunities for Partially Automated Vehicles with Application to Public Travel Survey Data Sets
- Risk Analysis of Autonomous Vehicles in Mixed Traffic Streams
- Assessing Public Acceptance of Connected Vehicle Systems in a New Scheme of Usage-Based Insurance

AAMVA AIC 2017 - New Guest Speaker Announced

The 2017 AAMVA Annual International Conference is just around the corner! Join us in San Francisco, August 21-23, for AAMVA's premier event for jurisdictions, industry, and federal partners to come together to share experiences and learn. Register today for the 2017 AAMVA Annual International Conference featuring:

An Industry Perspective on the Future of Dealers and Drivers
Sandy Schwartz, President, Cox Automotive
Wednesday, August 23 | Bayview AB, Bay Level
9:00 am - 10:00 am

Cox Automotive is a software and solutions provider to the auto industry and home to leading brands such as Manheim, Autotrader, Kelley Blue Book and Dealertrack. President Sandy Schwartz will share his views on the future of the industry and the impact on the motor vehicle community.

This Week's Webinars

NMVTIS Suspense Resolution for Online States (AMIE Version) - Part 2
Wednesday, August 9, 2017, 2:00 - 3:00 pm (ET)
NMVTIS has two third party transactions that involve updates between the central site and multiple states. Because the transactions involve multiple states and the central site, it is possible for a transaction to break down before it completes. Further activity against this title record is greatly restricted until the problem is resolved. This webinar provides instruction as to how to identify and resume suspended transactions. The intended audience for this webinar are NMVTIS Help Desk Personnel, Business Process Analyst and IT System Integrators.

New Jersey: New Parking Placards for Disabled Veterans and Purple Heart Recipients

New Jersey Motor Vehicle Commission (MVC) Chairman and Chief Administrator Raymond P. Martinez gathered with representatives from the New Jersey Department of Military and Veterans Affairs and local veterans groups at VFW Post 1333 in Asbury Park to announce the availability of new placards for disabled veterans and Purple Heart recipients which will exempt them from municipal parking meter fees. Read more here.

FEDERAL NEWS

FMCSA Announces Regulatory Guidance Concerning The Issuance Of Commercial Learner's Permits

The Federal Motor Carrier Safety Administration (FMCSA) announces regulatory guidance clarifying that State Driver Licensing Agencies (SDLAs) may agree to facilitate the commercial learner's permit (CLP) application process and to administer the commercial driver's license (CDL) general knowledge test to individuals who are not domiciled in the State. This guidance makes clear that SDLAs may accept applications for CLPs and administer the general knowledge test to individuals taking commercial motor vehicle driver training in that State, but who are not domiciled there, provided that: The SDLA administering the general knowledge test transmits the test results directly, securely, and electronically to the applicant's State of domicile; and the State of domicile agrees to accept the test results and issue the CLP. While this guidance is in answer to general knowledge testing as addressed in FMCSA regulations, the Administration notes that this regulatory guidance is consistent with the Agency's October 13, 2016, final rule which amended the CDL regulations to ease the transition of military personnel into civilian careers driving commercial motor vehicles (CMVs). The regulatory guidance is applicable August 3, 2017. The guidance expires August 3, 2022.

FMCSA Issues Rulemaking Procedures Update

The Federal Motor Carrier Safety Administration (FMCSA) has issued a Rulemaking Procedures Update. The Fixing America's Surface Transportation (FAST) Act requires FMCSA to address its rulemaking and petitions procedures. Specifically, section 5202 of the Act provides requirements for the Agency to follow regarding the development of proposed rulemakings. Section 5204 of the FAST Act also directs the Agency to be more transparent to the public regarding how FMCSA prioritizes and defines petitions.

DOT Solicits Infrastructure for Rebuilding America (INFRA) Grant Program Applications

The Department of Transportation solicits applications for the Infrastructure for Rebuilding America (INFRA) program grants under the program's FY 2017 and FY 2018 funding. The INFRA program will make approximately $1.5 billion available to projects that are in line with the Administration's principles to help rebuild America's infrastructure. In addition to providing direct federal funding, the INFRA program aims to increase the total investment by state, local, and private partners. INFRA advances the pre-existing Nationally Significant Freight and Highway Projects (NSFHP) grant program established in the FAST Act of 2015 and utilizes updated criteria to evaluate projects to align them with national and regional economic vitality goals and to leverage additional non-federal funding. The new program will increase the impact of projects by leveraging capital and allowing innovation in the project delivery and permitting processes, including public-private partnerships. Applications may be submitted through the Grants.gov portal and will be accepted through November 2, 2017.

Sent: Tuesday, August 8, 2017 4:38 AM
To: Thompson, Marla R (DOA)
Cc: Rangaraju, Nalini; Rusniak, Reed
Subject: Request Alaska/AAMVA AIC Meeting

Ms. Thompson,

I hope that this note finds you doing well. I am sending this email to a number of AAMVA AIC registrants requesting your assistance. AAMVA is reaching out to AIC conference attendees in an effort to promote participation in an AAMVA project that perhaps is familiar to you. For the last several years AAMVA has been contracting with the Department of Homeland Security in support of their E-Verify program. You may recall that some years ago AAMVA initiated what is known as the "RIDE" project (Records and Information from DMV's for E-Verify). To date we have several RIDE states participating in production. These states are utilizing this application with minimal message traffic across AAMVAnet to/from DHS. You may also be aware that the RIDE application uses an existing driver status transaction set. This was designed so that states could easily come on board since today all states have implemented this transaction set in production. The message flow is as follows: DHS sends a request to AAMVA, who in turn formats the existing driver status message and sends the message to the DL State of Record. The SOR responds back to AAMVA with the driver status response message. AAMVA then formats the response data and sends it directly to the Dept. of Homeland Security application. Please note that this is the only data exchanged within RIDE. The only minor requirement for a jurisdiction is to add a new entry (Network ID) within their AAMVA UNI Site Table file. Traffic is extremely light and has no negative impact on state systems.

AAMVA is working closely with Sara Bailey from DHS who is attending the AIC. I am sending this email on behalf of Nalini Rangaraju. Nalini is AAMVA's Verification System's project manager and will also be attending the conference. She is very interested in scheduling a convenient time with you and others from your jurisdiction. Both Sara and Nalini will explain the RIDE program and resulting benefits. They will have a handout to pass out at the meeting which clearly explains the program. There are of course no obligations required.

Would it be possible please to schedule a time during the AIC in which we can meet? **Looking at the conference schedule, could we please target breakfast Wednesday morning the 23rd?** We could meet at the entrance to the breakfast location (Grand Ballroom, Street Level). Please let me know and I can handle scheduling details by sending out a meeting invite. Also, if you think an alternate time would be better please do let me know.

Thank you so much for considering this and any assistance you might be able to provide. If there are other AK attendees that might be interested, please share this request with them. Have a safe trip to San Francisco and a very productive International Conference!

Thank you – Reed

Gary,

I see three withdrawals on H5 , one for B19 and two for B27.

The 2nd B27 has no Conviction or Linkages on the H3 and H7 messages respectively.

Can you please look…

Thanks,
Asma

Gary,

Since these are two different convictions (different Conviction date, Report ID's etc.,). these should be linked to new Withdrawal.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver N

Since the conviction was another B27 for a different conviction date, do you expect a new linked withdrawal or would this potentially be the same withdrawal that links both B27 convictions?

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver N

Yes, I would have expected an error response to be generated. Apparently there is some level of message parsing for logging purposes prior to request processing. I will pursue this as a fix.

This email comes from an external source, so remember, Think Before You Click!
Gary,

I sent the correct DLN, and received the responses.

For the initial try, since there was no pointer with DLN 'A7685517' in AI , shouldn't the error be "REQUESTED RECORD NOT FOUND" ?

ID	Clear Name and Identifier	Implementation Name	SOR Action on Data
CD04.LKU P.SB. 0100	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha-numeric Size=25	SOR attempts to locate the r using the DDLNUM contain message. If the record is no error message.

Gary,
For ACD Code B27, you need the withdrawal.

For the 1st conviction, the Withdrawal should be no less than 180 days or more than 1 year:

Table 15. Violating Out-of-Servi

FMCSR	FMCSR Description	ACD Code	
	Violating Out-of-Serv		
	1st conviction = no less than 180 days or more than 1 yr 1st conviction w/hazmat or in vehicle designed to transport 16+ passenger = no less thar 2nd conviction w/in 10 yr = no less than 2 yrs or more than 5 yrs 2nd conviction w/hazmat or in vehicle designed to transport 16+ passenger = no less tha 3rd conviction w/in 10 yr (no distinction for hazmat or number of passengers) = no less *NOTEs: disqualification period must be in addition to any other previous period of dis* *Only applicable when offense occurred in a CMV)* For 1st conviction – ACD Code of withdrawal is same as ACD Code of conviction; Retention Period: 15 years from the conviction date or for as long as any resulting with

Gary,

Since these are two different convictions (different Conviction date, Report ID's etc.,). these should be linked to new Withdrawal.

Thanks,
Asma

To: Syeda, Asma <ASyeda@aamva.org>

Cc: Singaraju, Sruti <ssingaraju@aamva.org>; Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver N

Since the conviction was another B27 for a different conviction date, do you expect a new linked withdrawal or would this potentially be the same withdrawal that links both B27 convictions?

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver N

Yes, I would have expected an error response to be generated. Apparently there is some level of message parsing for logging purposes prior to request processing. I will pursue this as a fix.

Gary,

I sent the correct DLN, and received the responses.

For the initial try, since there was no pointer with DLN 'A7685517' in AI , shouldn't the error be "REQUESTED RECORD NOT FOUND" ?

ID	Clear Name and Identifier	Implementation Name	SOR Action on Data
CD04.LKUP.SB.0100	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha-numeric Size=25	SOR attempts to locate the r using the DDLNUM contain message. If the record is no error message.

Gary,
For ACD Code B27, you need the withdrawal.

For the 1st conviction, the Withdrawal should be no less than 180 days or more than 1 year:

Table 15. Violating Out-of-Servi

FMCSR	FMCSR Description	ACD Code	
Violating Out-of-Serv			
1st conviction = no less than 180 days or more than 1 yr 1st conviction w/hazmat or in vehicle designed to transport 16+ passenger = no less thar 2nd conviction w/in 10 yr = no less than 2 yrs or more than 5 yrs 2nd conviction w/hazmat or in vehicle designed to transport 16+ passenger = no less tha 3rd conviction w/in 10 yr (no distinction for hazmat or number of passengers) = no less *NOTEs: disqualification period must be in addition to any other previous period of dis* *Only applicable when offense occurred in a CMV)* For 1st conviction – ACD Code of withdrawal is same as ACD Code of conviction; Retention Period: 15 years from the conviction date or for as long as any resulting with

Gary,

Since these are two different convictions (different Conviction date, Report ID's etc.,). these should be linked to new Withdrawal.

Thanks,
Asma

From: Gary Tancik [mailto:Gtancik@resdat.com]
Sent: Monday, August 7, 2017 1:57 PM
To: Syeda, Asma <ASyeda@aamva.org>

Since the conviction was another B27 for a different conviction date, do you expect a new linked withdrawal or would this potentially be the same withdrawal that links both B27 convictions?

Gary,

I sent the correct DLN, and received the responses.

For the initial try, since there was no pointer with DLN 'A7685517' in AI , shouldn't the error be "REQUESTED RECORD NOT FOUND" ?

ID	Clear Name and Identifier	Implementation Name	SOR Action on Data
CD04.LKUP.SB.0100	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha-numeric Size=25	SOR attempts to locate the r using the DDLNUM contain message. If the record is no error message.

Gary,
For ACD Code B27, you need the withdrawal.

For the 1st conviction, the Withdrawal should be no less than 180 days or more than 1 year:

Table 15. Violating Out-of-Servi

FMCSR	FMCSR Description	ACD Code	
Violating Out-of-Serv			
1st conviction = no less than 180 days or more than 1 yr 1st conviction w/hazmat or in vehicle designed to transport 16+ passenger = no less thar 2nd conviction w/in 10 yr = no less than 2 yrs or more than 5 yrs 2nd conviction w/hazmat or in vehicle designed to transport 16+ passenger = no less tha 3rd conviction w/in 10 yr (no distinction for hazmat or number of passengers) = no less *NOTEs: disqualification period must be in addition to any other previous period of dis* *Only applicable when offense occurred in a CMV)* For 1st conviction – ACD Code of withdrawal is same as ACD Code of conviction; Retention Period: 15 years from the conviction date or for as long as any resulting with

Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

This email comes from an external source, so remember, Think Before You Click!

Gary,

Driver L is added with Permit Endorsement as 'S' and Driver License Permit Classification Code as 'CLASS C' .

'S' Endorsement require 'P' Endorsement on the HC message.

'S' or 'P' Endorsement requires 'P' Restriction on the H6 Message

'S' or 'P' Endorsement with DL Permit Class Code 'C' requires 'N' Restriction on the H6 Message

CDN1. H2. Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

<ssingaraju@aamva.org>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

Gary,

Driver L is added with Permit Endorsement as 'S' and Driver License Permit Classification Code as 'CLASS C' .

'S' Endorsement require 'P' Endorsement on the HC message.

'S' or 'P' Endorsement requires 'P' Restriction on the H6 Message

'S' or 'P' Endorsement with DL Permit Class Code 'C' requires 'N' Restriction on the H6 Message

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

H2	x	x	x	x	P OR S ENDORSEMENT, CLASS C, REQUIRES N RESTRICTION

Sent: Tuesday, August 8, 2017 7:30 AM
To: Syeda, Asma
Cc: Peters, Mina L (DOA); Singaraju, Sruti
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

The note has me a bit perplexed. I had hoped maybe it was a typo that instead a different state would create the duplicate pointers.

For a given DLN there can only be one driver with info such as name, dob, ssn, etc. Since this step is a UC that changes the driver info, I believe I can first set up the new driver info under a different DLN. However, only two types of pointers can be created for a driver whereby doc type is "1" or "3". The CDLIS indicator could be "N" or "Y" for these two pointers but there would not be a means to manage a CDLIS =N set of "1" and "3" along with a CDLIS=Y set of "1" and "3" pointers.

It may be possible for me to force these creation of these different pointer sets although subsequent changes and deletion of the pointers may be problematic. Please help me understand how I can provide an adequate set up for this test.

thanks

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

Gary,

All the test case infers is, when AI does a Change data, it creates 5 duplicates with in the state.

Can you add 5 pointers with the new data (the DLN can be different)

Let me know if you have any questions.

Thanks,
Asma

Gary,

All the test case infers is, when AI does a Change data, it creates 5 duplicates with in the state.

Can you add 5 pointers with the new data (the DLN can be different)

Let me know if you have any questions.

Thanks,
Asma

From: Gary Tancik [mailto:Gtancik@resdat.com]

To: Syeda, Asma <ASyeda@aamva.org>
Cc: Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>; Singaraju, Sruti <ssingaraju@aamva.org>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

The note has me a bit perplexed. I had hoped maybe it was a typo that instead a different state would create the duplicate pointers.

For a given DLN there can only be one driver with info such as name, dob, ssn, etc. Since this step is a UC that changes the driver info, I believe I can first set up the new driver info under a different DLN. However, only two types of pointers can be created for a driver whereby doc type is "1" or "3". The CDLIS indicator could be "N" or "Y" for these two pointers but there would not be a means to manage a CDLIS =N set of "1" and "3" along with a CDLIS=Y set of "1" and "3" pointers.

It may be possible for me to force these creation of these different pointer sets although subsequent changes and deletion of the pointers may be problematic. Please help me understand how I can provide an adequate set up for this test.

thanks

Gary,

L3 looks good.
Please proceed with #L4.

Blow is the note for # L4:

Note: Ensure AI adds Five matching Duplicate Pointer (with CDLIS Pointer Indicator (DCDCPI) = N for some and Y for the Others and State Document Type (BJDTYP) = 1 or 2) before AI executes this Test Case.

Thanks,
Asma

Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

The note has me a bit perplexed. I had hoped maybe it was a typo that instead a different state would create the duplicate pointers.

For a given DLN there can only be one driver with info such as name, dob, ssn, etc. Since this step is a UC that changes the driver info, I believe I can first set up the new driver info under a different DLN. However, only two types of pointers can be created for a driver whereby doc type is "1" or "3". The CDLIS indicator could be "N" or "Y" for these two pointers but there would not be a means to manage a CDLIS =N set of "1" and "3" along with a CDLIS=Y set of "1" and "3" pointers.

It may be possible for me to force these creation of these different pointer sets although subsequent changes and deletion of the pointers may be problematic. Please help me understand how I can provide an adequate set up for this test.

thanks

Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

Gary,

All the test case infers is, when AI does a Change data, it creates 5 duplicates with in the state.

Can you add 5 pointers with the new data (the DLN can be different)

Let me know if you have any questions.

Thanks,
Asma

From: Gary Tancik [mailto:Gtancik@resdat.com]

To: Syeda, Asma <ASyeda@aamva.org>
Cc: Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>; Singaraju, Sruti <ssingaraju@aamva.org>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

The note has me a bit perplexed. I had hoped maybe it was a typo that instead a different state would create the duplicate pointers.

For a given DLN there can only be one driver with info such as name, dob, ssn, etc. Since this step is a UC that changes the driver info, I believe I can first set up the new driver info under a different DLN. However, only two types of pointers can be created for a driver whereby doc type is "1" or "3". The CDLIS indicator could be "N" or "Y" for these two pointers but there would not be a means to manage a CDLIS =N set of "1" and "3" along with a CDLIS=Y set of "1" and "3" pointers.

It may be possible for me to force these creation of these different pointer sets although subsequent changes and deletion of the pointers may be problematic. Please help me understand how I can provide an adequate set up for this test.

thanks

Gary,

L3 looks good.
Please proceed with #L4.

Blow is the note for # L4:

Note: Ensure AI adds Five matching Duplicate Pointer (with CDLIS Pointer Indicator (DCDCPI) = N for some and Y for the Others and State Document Type (BJDTYP) = 1 or 2) before AI executes this Test Case.

Thanks,
Asma

Subject: Question about - AK (AI) SSOLV Capability end to end Testing Test Case 009

Hello Nadeem,

I have a question regarding 'AK (AI) SSOLV Capability end to end Testing Test Case 009'.

The date of birth for this test is 08/22/07. Would this be 08/22/1907 or 08/22/2007?

If it is 08/22/2007, we don't have any license processing available for a 9 year old person, so we would not be able to complete this test. I can send you our validation errors if you like.

Thank you.

Gary,

All the test case infers is, when AI does a Change data, it creates 5 duplicates with in the state.

Can you add 5 pointers with the new data (the DLN can be different)

Let me know if you have any questions.

Thanks,
Asma

From: Gary Tancik [mailto:Gtancik@resdat.com]

To: Syeda, Asma <ASyeda@aamva.org>
Cc: Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>; Singaraju, Sruti <ssingaraju@aamva.org>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

The note has me a bit perplexed. I had hoped maybe it was a typo that instead a different state would create the duplicate pointers.

For a given DLN there can only be one driver with info such as name, dob, ssn, etc. Since this step is a UC that changes the driver info, I believe I can first set up the new driver info under a different DLN. However, only two types of pointers can be created for a driver whereby doc type is "1" or "3". The CDLIS indicator could be "N" or "Y" for these two pointers but there would not be a means to manage a CDLIS =N set of "1" and "3" along with a CDLIS=Y set of "1" and "3" pointers.

It may be possible for me to force these creation of these different pointer sets although subsequent changes and deletion of the pointers may be problematic. Please help me understand how I can provide an adequate set up for this test.

thanks

Gary,

L3 looks good.
Please proceed with #L4.

Blow is the note for # L4:

Note: Ensure AI adds Five matching Duplicate Pointer (with CDLIS Pointer Indicator (DCDCPI) = N for some and Y for the Others and State Document Type (BJDTYP) = 1 or 2) before AI executes this Test Case.

Thanks,
Asma

Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

From: Gary Tancik
Sent: Wednesday, July 26, 2017 9:32 AM
To: 'Syeda, Asma' <ASyeda@aamva.org>

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

Gary,

All the test case infers is, when AI does a Change data, it creates 5 duplicates with in the state.

Can you add 5 pointers with the new data (the DLN can be different)

Let me know if you have any questions.

Document ID: 0.7.1187.19400 DMV00050312

Thanks,
Asma

To: Syeda, Asma <ASyeda@aamva.org>
Cc: Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>; Singaraju, Sruti <ssingaraju@aamva.org>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

The note has me a bit perplexed. I had hoped maybe it was a typo that instead a different state would create the duplicate pointers.

For a given DLN there can only be one driver with info such as name, dob, ssn, etc. Since this step is a UC that changes the driver info, I believe I can first set up the new driver info under a different DLN. However, only two types of pointers can be created for a driver whereby doc type is "1" or "3". The CDLIS indicator could be "N" or "Y" for these two pointers but there would not be a means to manage a CDLIS =N set of "1" and "3" along with a CDLIS=Y set of "1" and "3" pointers.

It may be possible for me to force these creation of these different pointer sets although subsequent changes and deletion of the pointers may be problematic. Please help me understand how I can provide an adequate set up for this test.

thanks

Gary,

L3 looks good.
Please proceed with #L4.

Blow is the note for # L4:

Note: Ensure AI adds Five matching Duplicate Pointer (with CDLIS Pointer Indicator (DCDCPI) = N for some and Y for the Others and State Document Type (BJDTYP) = 1 or 2) before AI executes this Test Case.

Thanks,
Asma

Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

From: Gary Tancik
Sent: Wednesday, July 26, 2017 9:32 AM
To: 'Syeda, Asma' <ASyeda@aamva.org>

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

Gary,

All the test case infers is, when AI does a Change data, it creates 5 duplicates with in the state.

Can you add 5 pointers with the new data (the DLN can be different)

Let me know if you have any questions.

Thanks,
Asma

Cc: Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>; Singaraju, Sruti <ssingaraju@aamva.org>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

The note has me a bit perplexed. I had hoped maybe it was a typo that instead a different state would create the duplicate pointers.

For a given DLN there can only be one driver with info such as name, dob, ssn, etc. Since this step is a UC that changes the driver info, I believe I can first set up the new driver info under a different DLN. However, only two types of pointers can be created for a driver whereby doc type is "1" or "3". The CDLIS indicator could be "N" or "Y" for these two pointers but there would not be a means to manage a CDLIS =N set of "1" and "3" along with a CDLIS=Y set of "1" and "3" pointers.

It may be possible for me to force these creation of these different pointer sets although subsequent changes and deletion of the pointers may be problematic. Please help me understand how I can provide an adequate set up for this test.

thanks

Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

Gary,

All the test case infers is, when AI does a Change data, it creates 5 duplicates with in the state.

Can you add 5 pointers with the new data (the DLN can be different)

Let me know if you have any questions.

Thanks,
Asma

To: Syeda, Asma <ASyeda@aamva.org>
Cc: Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>; Singaraju, Sruti <ssingaraju@aamva.org>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

The note has me a bit perplexed. I had hoped maybe it was a typo that instead a different state would create the duplicate pointers.

For a given DLN there can only be one driver with info such as name, dob, ssn, etc. Since this step is a UC that changes the driver info, I believe I can first set up the new driver info under a different DLN. However, only two types of pointers can be created for a driver whereby doc type is "1" or "3". The CDLIS indicator could be "N" or "Y" for these two pointers but there would not be a means to manage a CDLIS =N set of "1" and "3" along with a CDLIS=Y set of "1" and "3" pointers.

It may be possible for me to force these creation of these different pointer sets although subsequent changes and deletion of the pointers may be problematic. Please help me understand how I can provide an adequate set up for this test.

thanks

Gary,

L3 looks good.
Please proceed with #L4.

Blow is the note for # L4:

Note: Ensure AI adds Five matching Duplicate Pointer (with CDLIS Pointer Indicator (DCDCPI) = N for some and Y for the Others and State Document Type (BJDTYP) = 1 or 2) before AI executes this Test Case.

Thanks,
Asma

Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

Gary,

All the test case infers is, when AI does a Change data, it creates 5 duplicates with in the state.

Can you add 5 pointers with the new data (the DLN can be different)

Let me know if you have any questions.

Thanks,
Asma

To: Syeda, Asma <ASyeda@aamva.org>
Cc: Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>; Singaraju, Sruti <ssingaraju@aamva.org>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

The note has me a bit perplexed. I had hoped maybe it was a typo that instead a different state would create the duplicate pointers.

For a given DLN there can only be one driver with info such as name, dob, ssn, etc. Since this step is a UC that changes the driver info, I believe I can first set up the new driver info under a different DLN. However, only two types of pointers can be created for a driver whereby doc type is "1" or "3". The CDLIS indicator could be "N" or "Y" for these two pointers but there would not be a means to manage a CDLIS =N set of "1" and "3" along with a CDLIS=Y set of "1" and "3" pointers.

It may be possible for me to force these creation of these different pointer sets although subsequent changes and deletion of the pointers may be problematic. Please help me understand how I can provide an adequate set up for this test.

thanks

Gary,

L3 looks good.
Please proceed with #L4.

Blow is the note for # L4:

Note: Ensure AI adds Five matching Duplicate Pointer (with CDLIS Pointer Indicator (DCDCPI) = N for some and Y for the Others and State Document Type (BJDTYP) = 1 or 2) before AI executes this Test Case.

Thanks,
Asma

Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

Gary,

Driver L is added with Permit Endorsement as 'S' and Driver License Permit Classification Code as 'CLASS C' .

'S' Endorsement require 'P' Endorsement on the HC message.

'S' or 'P' Endorsement requires 'P' Restriction on the H6 Message

'S' or 'P' Endorsement with DL Permit Class Code 'C' requires 'N' Restriction on the H6 Message

Gary,

All the test case infers is, when AI does a Change data, it creates 5 duplicates with in the state.

Can you add 5 pointers with the new data (the DLN can be different)

Let me know if you have any questions.

Thanks,
Asma

To: Syeda, Asma <ASyeda@aamva.org>
Cc: Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>; Singaraju, Sruti <ssingaraju@aamva.org>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

The note has me a bit perplexed. I had hoped maybe it was a typo that instead a different state would create the duplicate pointers.

For a given DLN there can only be one driver with info such as name, dob, ssn, etc. Since this step is a UC that changes the driver info, I believe I can first set up the new driver info under a different DLN. However, only two types of pointers can be created for a driver whereby doc type is "1" or "3". The CDLIS indicator could be "N" or "Y" for these two pointers but there would not be a means to manage a CDLIS =N set of "1" and "3" along with a CDLIS=Y set of "1" and "3" pointers.

It may be possible for me to force these creation of these different pointer sets although subsequent changes and deletion of the pointers may be problematic. Please help me understand how I can provide an adequate set up for this test.

thanks

Gary,

L3 looks good.
Please proceed with #L4.

Blow is the note for # L4:

Note: Ensure AI adds Five matching Duplicate Pointer (with CDLIS Pointer Indicator (DCDCPI) = N for some and Y for the Others and State Document Type (BJDTYP) = 1 or 2) before AI executes this Test Case.

Thanks,
Asma

Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

Gary,

All the test case infers is, when AI does a Change data, it creates 5 duplicates with in the state.

Can you add 5 pointers with the new data (the DLN can be different)

Let me know if you have any questions.

Document ID: 0.7.1187.19393 DMV00050385

Thanks,
Asma

To: Syeda, Asma <ASyeda@aamva.org>
Cc: Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>; Singaraju, Sruti <ssingaraju@aamva.org>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

The note has me a bit perplexed. I had hoped maybe it was a typo that instead a different state would create the duplicate pointers.

For a given DLN there can only be one driver with info such as name, dob, ssn, etc. Since this step is a UC that changes the driver info, I believe I can first set up the new driver info under a different DLN. However, only two types of pointers can be created for a driver whereby doc type is "1" or "3". The CDLIS indicator could be "N" or "Y" for these two pointers but there would not be a means to manage a CDLIS =N set of "1" and "3" along with a CDLIS=Y set of "1" and "3" pointers.

It may be possible for me to force these creation of these different pointer sets although subsequent changes and deletion of the pointers may be problematic. Please help me understand how I can provide an adequate set up for this test.

thanks

Gary,

L3 looks good.
Please proceed with #L4.

Blow is the note for # L4:

Note: Ensure AI adds Five matching Duplicate Pointer (with CDLIS Pointer Indicator (DCDCPI) = N for some and Y for the Others and State Document Type (BJDTYP) = 1 or 2) before AI executes this Test Case.

Thanks,
Asma

Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

Gary,

All the test case infers is, when AI does a Change data, it creates 5 duplicates with in the state.

Can you add 5 pointers with the new data (the DLN can be different)

Let me know if you have any questions.

Thanks,
Asma

Cc: Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>; Singaraju, Sruti <ssingaraju@aamva.org>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

The note has me a bit perplexed. I had hoped maybe it was a typo that instead a different state would create the duplicate pointers.

For a given DLN there can only be one driver with info such as name, dob, ssn, etc. Since this step is a UC that changes the driver info, I believe I can first set up the new driver info under a different DLN. However, only two types of pointers can be created for a driver whereby doc type is "1" or "3". The CDLIS indicator could be "N" or "Y" for these two pointers but there would not be a means to manage a CDLIS =N set of "1" and "3" along with a CDLIS=Y set of "1" and "3" pointers.

It may be possible for me to force these creation of these different pointer sets although subsequent changes and deletion of the pointers may be problematic. Please help me understand how I can provide an adequate set up for this test.

thanks

Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

Gary,

All the test case infers is, when AI does a Change data, it creates 5 duplicates with in the state.

Can you add 5 pointers with the new data (the DLN can be different)

Let me know if you have any questions.

Thanks,
Asma

To: Syeda, Asma <ASyeda@aamva.org>
Cc: Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>; Singaraju, Sruti <ssingaraju@aamva.org>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

The note has me a bit perplexed. I had hoped maybe it was a typo that instead a different state would create the duplicate pointers.

For a given DLN there can only be one driver with info such as name, dob, ssn, etc. Since this step is a UC that changes the driver info, I believe I can first set up the new driver info under a different DLN. However, only two types of pointers can be created for a driver whereby doc type is "1" or "3". The CDLIS indicator could be "N" or "Y" for these two pointers but there would not be a means to manage a CDLIS =N set of "1" and "3" along with a CDLIS=Y set of "1" and "3" pointers.

It may be possible for me to force these creation of these different pointer sets although subsequent changes and deletion of the pointers may be problematic. Please help me understand how I can provide an adequate set up for this test.

thanks

Gary,

L3 looks good.
Please proceed with #L4.

Blow is the note for # L4:

Note: Ensure AI adds Five matching Duplicate Pointer (with CDLIS Pointer Indicator (DCDCPI) = N for some and Y for the Others and State Document Type (BJDTYP) = 1 or 2) before AI executes this Test Case.

Thanks,
Asma

Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

Cc: Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>; Singaraju, Sruti <ssingaraju@aamva.org>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

Gary,

All the test case infers is, when AI does a Change data, it creates 5 duplicates with in the state.

Can you add 5 pointers with the new data (the DLN can be different)

Let me know if you have any questions.

Thanks,
Asma

From: Gary Tancik [mailto:Gtancik@resdat.com]

To: Syeda, Asma <ASyeda@aamva.org>
Cc: Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>; Singaraju, Sruti <ssingaraju@aamva.org>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

The note has me a bit perplexed. I had hoped maybe it was a typo that instead a different state would create the duplicate pointers.

For a given DLN there can only be one driver with info such as name, dob, ssn, etc. Since this step is a UC that changes the driver info, I believe I can first set up the new driver info under a different DLN. However, only two types of pointers can be created for a driver whereby doc type is "1" or "3". The CDLIS indicator could be "N" or "Y" for these two pointers but there would not be a means to manage a CDLIS =N set of "1" and "3" along with a CDLIS=Y set of "1" and "3" pointers.

It may be possible for me to force these creation of these different pointer sets although subsequent changes and deletion of the pointers may be problematic. Please help me understand how I can provide an adequate set up for this test.

thanks

Gary,

L3 looks good.
Please proceed with #L4.

Blow is the note for # L4:

Note: Ensure AI adds Five matching Duplicate Pointer (with CDLIS Pointer Indicator (DCDCPI) = N for some and Y for the Others and State Document Type (BJDTYP) = 1 or 2) before AI executes this Test Case.

Thanks,
Asma

Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

Gary,

Sure, you can talk with Mina on this.

Can I re-try # L1?

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

Gary,

Driver L is added with Permit Endorsement as 'S' and Driver License Permit Classification Code as 'CLASS C' .

'S' Endorsement require 'P' Endorsement on the HC message.

'S' or 'P' Endorsement requires 'P' Restriction on the H6 Message

'S' or 'P' Endorsement with DL Permit Class Code 'C' requires 'N' Restriction on the H6 Message

CDN1. H2. XCHK. 300	Driver License Permit Endorsement Group Code (DDLEP1)	CLMF-DESC-PERM-ENDORSE Format=Alpha-numeric Size=5	If one entry in any occurrence of Driver License Permit Endorsement Group Code (DDLEP1) is 'S', then one entry in the corresponding occurrence of Driver License Permit Endorsement Group Code (DDLEP1) must be 'P'. Gary,

All the test case infers is, when AI does a Change data, it creates 5 duplicates with in the state.

Can you add 5 pointers with the new data (the DLN can be different)

Let me know if you have any questions.

Thanks,
Asma

From: Gary Tancik [mailto:Gtancik@resdat.com]

To: Syeda, Asma <ASyeda@aamva.org>
Cc: Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>; Singaraju, Sruti <ssingaraju@aamva.org>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

The note has me a bit perplexed. I had hoped maybe it was a typo that instead a different state would create the duplicate pointers.

For a given DLN there can only be one driver with info such as name, dob, ssn, etc. Since this step is a UC that changes the driver info, I believe I can first set up the new driver info under a different DLN. However, only two types of pointers can be created for a driver whereby doc type is "1" or "3". The CDLIS indicator could be "N" or "Y" for these two pointers but there would not be a means to manage a CDLIS =N set of "1" and "3" along with a CDLIS=Y set of "1" and "3" pointers.

It may be possible for me to force these creation of these different pointer sets although subsequent changes and deletion of the pointers may be problematic. Please help me understand how I can provide an adequate set up for this test.

thanks

Please proceed with #L4.

Blow is the note for # L4:

Note: Ensure AI adds Five matching Duplicate Pointer (with CDLIS Pointer Indicator (DCDCPI) = N for some and Y for the Others and State Document Type (BJDTYP) = 1 or 2) before AI executes this Test Case.

Thanks,
Asma

Gary,

The permits and endorsements looks fine.

I see that the Permit is valid for 2 years, it can just be a data set up issue.

Can you please look.

Thanks,
Asma

Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

Gary,

All the test case infers is, when AI does a Change data, it creates 5 duplicates with in the state.

Can you add 5 pointers with the new data (the DLN can be different)

Let me know if you have any questions.

Thanks,
Asma

Cc: Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>; Singaraju, Sruti <ssingaraju@aamva.org>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

The note has me a bit perplexed. I had hoped maybe it was a typo that instead a different state would create the duplicate pointers.

For a given DLN there can only be one driver with info such as name, dob, ssn, etc. Since this step is a UC that changes the driver info, I believe I can first set up the new driver info under a different DLN. However, only two types of pointers can be created for a driver whereby doc type is "1" or "3". The CDLIS indicator could be "N" or "Y" for these two pointers but there would not be a means to manage a CDLIS =N set of "1" and "3" along with a CDLIS=Y set of "1" and "3" pointers.

It may be possible for me to force these creation of these different pointer sets although subsequent changes and deletion of the pointers may be problematic. Please help me understand how I can provide an adequate set up for this test.

thanks

Gary,

L3 looks good.
Please proceed with #L4.

Blow is the note for # L4:

Note: Ensure AI adds Five matching Duplicate Pointer (with CDLIS Pointer Indicator (DCDCPI) = N for some and Y for the Others and State Document Type (BJDTYP) = 1 or 2) before AI executes this Test Case.

Thanks,
Asma

Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

Hello Nadeem,

Please find attached the results from SSOLV Test Case 004

Please let me know if you have any questions or issues. As requested in the test plan, I will send the rest of the tests in separate emails.

Thanks.

Gary,

All the test case infers is, when AI does a Change data, it creates 5 duplicates with in the state.

Can you add 5 pointers with the new data (the DLN can be different)

Let me know if you have any questions.

Thanks,
Asma

From: Gary Tancik [mailto:Gtancik@resdat.com]
Sent: Tuesday, August 8, 2017 11:30 AM
To: Syeda, Asma <ASyeda@aamva.org>

Cc: Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>; Singaraju, Sruti <ssingaraju@aamva.org>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

The note has me a bit perplexed. I had hoped maybe it was a typo that instead a different state would create the duplicate pointers.

For a given DLN there can only be one driver with info such as name, dob, ssn, etc. Since this step is a UC that changes the driver info, I believe I can first set up the new driver info under a different DLN. However, only two types of pointers can be created for a driver whereby doc type is "1" or "3". The CDLIS indicator could be "N" or "Y" for these two pointers but there would not be a means to manage a CDLIS =N set of "1" and "3" along with a CDLIS=Y set of "1" and "3" pointers.

It may be possible for me to force these creation of these different pointer sets although subsequent changes and deletion of the pointers may be problematic. Please help me understand how I can provide an adequate set up for this test.

thanks

Gary,

L3 looks good.
Please proceed with #L4.

Blow is the note for # L4:

Note: Ensure AI adds Five matching Duplicate Pointer (with CDLIS Pointer Indicator (DCDCPI) = N for some and Y for the Others and State Document Type (BJDTYP) = 1 or 2) before AI executes this Test Case.

Thanks,
Asma

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

Cc: Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>; Singaraju, Sruti <ssingaraju@aamva.org>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

Gary,

Driver L is added with Permit Endorsement as 'S' and Driver License Permit Classification Code as 'CLASS C' .

'S' Endorsement require 'P' Endorsement on the HC message.

'S' or 'P' Endorsement requires 'P' Restriction on the H6 Message

'S' or 'P' Endorsement with DL Permit Class Code 'C' requires 'N' Restriction on the H6 Message

CDN1. H2. XCHK. 300	Driver License Permit Endorsement Group Code (DDLEP1)	CLMF-DESC-PERM-ENDORSE Format=Alpha-numeric Size=5	If one entry in any occurrence of Driver License Permit Endorsement Group Code (DDLEP1) is 'S', then one entry in the corresponding occurrence of Driver License Permit Endorsement Group Code (DDLEP1) must be 'P'. Gary,

All the test case infers is, when AI does a Change data, it creates 5 duplicates with in the state.

Can you add 5 pointers with the new data (the DLN can be different)

Let me know if you have any questions.

Thanks,
Asma

Cc: Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>; Singaraju, Sruti <ssingaraju@aamva.org>
Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

The note has me a bit perplexed. I had hoped maybe it was a typo that instead a different state would create the duplicate pointers.

For a given DLN there can only be one driver with info such as name, dob, ssn, etc. Since this step is a UC that changes the driver info, I believe I can first set up the new driver info under a different DLN. However, only two types of pointers can be created for a driver whereby doc type is "1" or "3". The CDLIS indicator could be "N" or "Y" for these two pointers but there would not be a means to manage a CDLIS =N set of "1" and "3" along with a CDLIS=Y set of "1" and "3" pointers.

It may be possible for me to force these creation of these different pointer sets although subsequent changes and deletion of the pointers may be problematic. Please help me understand how I can provide an adequate set up for this test.

thanks

Gary,

L3 looks good.
Please proceed with #L4.

Blow is the note for # L4:

Note: Ensure AI adds Five matching Duplicate Pointer (with CDLIS Pointer Indicator (DCDCPI) = N for some and Y for the Others and State Document Type (BJDTYP) = 1 or 2) before AI executes this Test Case.

Thanks,
Asma

Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

Subject: RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

Subject: RE: AI-SPEXS 6.0 Baseline Structured test plan - FP-Driver D

Ok, the name validations need some work. Is it possible to jump ahead and run D12? We can re-run it after the fix but just wanted to see if those conditions are correct.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Gary

Gary,

With the weekly DB Refresh, pointer was deleted.

Can you please add the pointer back, so I can send the UD message.

Thanks,
Asma

Subject: RE: AI-SPEXS 6.0 Baseline Structured test plan - FP-Driver D

Thanks for running that. I'll need to spend time fixing the name validations but we should be able to retest C15. Can we try it again?

Gary,

D4 sent, error received.

But GPROST was sent as '02', I was expecting '01:

Value	Meaning/Description
*** ALL APPLICATIONS ***	
'00'	Processing successful
*** MOST APPLICATIONS ***	
* (all applications except 02, 05 & 12) *	
'01'	Processing unsuccessful
*** CDLIS (02) and SPEXS (37) ***	
'01'	Logic error
	(i.e. record not found or data look up error)
'02'	System error
	(i.e. file off-line)
'03'	Syntax error
	(i.e. element required, content or cross check)
'04'	Security Exception
	(i.e. authentication or authorization error)
'05'	
	Confirmation of new SOR, but DHR not ready
'06'	
	Message sent outside of CDLIS processing window
'07'	

Can you please look.

Thanks,
Asma

Gary,

With the weekly DB Refresh, pointer was deleted.

Can you please add the pointer back, so I can send the UD message.

Thanks,
Asma

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

Subject: RE: AI-SPEXS 6.0 Baseline Structured test plan - FP-Driver D

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

Yes, this is the same general problem I am resolving for Driver C. Hopefully I will have a fix deployed shortly.

Gary,

I was expecting # D2 in error “DUPLICATE CONVICTION”, but received ‘9999 99TE CONVICTION’.

Can you please look.

Thanks,
Asma

Thanks Asma

Siri, we left off at D2 and can continue when you're ready.

We also have not finished Driver C. I believe we left off at C12 if you'd rather pick up from there.

Subject: RE: AI-SPEXS 6.0 Baseline Structured test plan - FP-Driver D

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

Subject: RE: AI-SPEXS 6.0 Baseline Structured test plan - FP-Driver D

This is another fix. The problems with error responses may be a little more involved than the CSOR problem. I will see if I can resolve it fist so hopefully we can wrap up Driver C today. I'll let you know hopefully within the hour.

Gary,

D4 sent, error received.

But GPROST was sent as '02', I was expecting '01:

Document ID: 0.7.1187.19352 DMV00050615

Value	Meaning/Description
*** ALL APPLICATIONS ***	
'00'	Processing successful
*** MOST APPLICATIONS ***	
* (all applications except 02, 05 & 12) *	
'01'	Processing unsuccessful
*** CDLIS (02) and SPEXS (37) ***	
'01'	Logic error
	(i.e. record not found or data look up error)
'02'	System error
	(i.e. file off-line)
'03'	Syntax error
	(i.e. element required, content or cross check)
'04'	Security Exception
	(i.e. authentication or authorization error)
'05'	
	Confirmation of new SOR, but DHR not ready
'06'	
	Message sent outside of CDLIS processing window
'07'	

Can you please look.

Thanks,
Asma

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Gary

Subject: RE: AI-SPEXS 6.0 Baseline Structured test plan - FP-Driver D

Ok, the name validations need some work. Is it possible to jump ahead and run D12? We can re-run it after the fix but just wanted to see if those conditions are correct.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

Gary,

With the weekly DB Refresh, pointer was deleted.

Can you please add the pointer back, so I can send the UD message.

Thanks,
Asma

Gary,

D4 sent, error received.

But GPROST was sent as '02', I was expecting '01:

Value	Meaning/Description
*** ALL APPLICATIONS ***	
'00'	Processing successful
*** MOST APPLICATIONS ***	
* (all applications except 02, 05 & 12) *	
'01'	Processing unsuccessful
*** CDLIS (02) and SPEXS (37) ***	
'01'	Logic error
	(i.e. record not found or data look up error)
'02'	System error
	(i.e. file off-line)
'03'	Syntax error
	(i.e. element required, content or cross check)
'04'	Security Exception
	(i.e. authentication or authorization error)
'05'	
	Confirmation of new SOR, but DHR not ready
'06'	
	Message sent outside of CDLIS processing window
'07'	

Can you please look.

Thanks,
Asma

Gary,

The HB was sent with NCB Error as 'N' , and without the error "REQUESTED RECORD NOT FOUND".

Hence, had common validation errors :

ERROR BLOCK OUT	1	9999 99NAME REQUIRED
ERROR BLOCK OUT	4	9999 99DRIVER LICENSE NUMBER REQUIRED
ERROR BLOCK OUT	2	9999 99DOB REQUIRED
ERROR BLOCK OUT	5	
ERROR BLOCK OUT	3	9999 99STATE CODE REQUIRED

Can you please look.

Thanks,
Asma

Thanks Asma

Siri, we left off at D2 and can continue when you're ready.

We also have not finished Driver C. I believe we left off at C12 if you'd rather pick up from there.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

This is another fix. The problems with error responses may be a little more involved than the CSOR problem. I will see if I can resolve it fist so hopefully we can wrap up Driver C today. I'll let you know hopefully within the hour.

Gary,

D4 sent, error received.

But GPROST was sent as '02', I was expecting '01:

Value	Meaning/Description
*** ALL APPLICATIONS ***	
'00'	Processing successful
*** MOST APPLICATIONS ***	
* (all applications except 02, 05 & 12) *	
'01'	Processing unsuccessful
*** CDLIS (02) and SPEXS (37) ***	
'01'	Logic error
	(i.e. record not found or data look up error)
'02'	System error
	(i.e. file off-line)
'03'	Syntax error
	(i.e. element required, content or cross check)
'04'	Security Exception
	(i.e. authentication or authorization error)
'05'	
	Confirmation of new SOR, but DHR not ready
'06'	
	Message sent outside of CDLIS processing window
'07'	

Can you please look.

Thanks,
Asma

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

Subject: RE: AI-SPEXS 6.0 Baseline Structured test plan - FP-Driver D

Ok, the name validations need some work. Is it possible to jump ahead and run D12? We can re-run it after the fix but just wanted to see if those conditions are correct.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

Gary,

The HB was sent with NCB Error as 'N' , and without the error "REQUESTED RECORD NOT FOUND".

Hence, had common validation errors :

ERROR BLOCK OUT	1	9999 99NAME REQUIRED
ERROR BLOCK OUT	4	9999 99DRIVER LICENSE NUMBER REQUIRED
ERROR BLOCK OUT	2	9999 99DOB REQUIRED
ERROR BLOCK OUT	5	
ERROR BLOCK OUT	3	9999 99STATE CODE REQUIRED

Can you please look.

Thanks,
Asma

This is another fix. The problems with error responses may be a little more involved than the CSOR problem. I will see if I can resolve it fist so hopefully we can wrap up Driver C today. I'll let you know hopefully within the hour.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

Monica,

Please revisit test case #009. Your system is responding with an SSOLV Verification Response of 2. The expected results should be a SSOLV Verification Response of 6 - "SSN, Name, and DOB match; SSA records indicate person is deceased".

Please let me know if you have any questions.

Thank you,

Nadeem

Subject: National Driver Register Cleanfile - September 17, 2017

PDPS Participants:

The National Driver Register will conduct a Cleanfile on September 17th, 2017.

Cleanfile is an optional process. It is a means for jurisdictions to refresh the pointers it has on PDPS. NDR replaces all pointers on the PDPS file with the Cleanfile set of pointers sent by the jurisdiction. In order for a pointer to be included in the Cleanfile, the associated record in the jurisdiction must contain a conviction or withdrawal specified in 23 CFR Part 1327 section 1327.5 (a) or in Appendix A to that rule.

To participate in this Cleanfile, please email NDR by September 6th, 2017, and plan to send your file to NDR no later than September 13th, 2017.

Cleanfiles must be submitted via Secure FTP or FTP. Please schedule a test of SFTP/FTP connectivity with NDR before attempting to send the full Cleanfile.

If you plan to participate in this Cleanfile or if you have any questions please contact the NDR Office by sending an e-mail to NDR_Operations@dot.gov<mailto:NDR_Operations@dot.gov.

Gary,

With the weekly DB Refresh, pointer was deleted.

Can you please add the pointer back, so I can send the UD message.

Thanks,
Asma

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

Gary,

I was expecting # D2 in error “DUPLICATE CONVICTION”, but received ‘9999 99TE CONVICTION’.

Can you please look.

Thanks,
Asma

Gary,

The HB was sent with NCB Error as 'N' , and without the error "REQUESTED RECORD NOT FOUND".

Hence, had common validation errors :

ERROR BLOCK OUT	1	9999 99NAME REQUIRED
ERROR BLOCK OUT	4	9999 99DRIVER LICENSE NUMBER REQUIRED
ERROR BLOCK OUT	2	9999 99DOB REQUIRED
ERROR BLOCK OUT	5	
ERROR BLOCK OUT	3	9999 99STATE CODE REQUIRED

Can you please look.

Thanks,
Asma

Gary,

Can I send # D4?

From: Gary Tancik [mailto:Gtancik@resdat.com]
Sent: Friday, July 14, 2017 11:14 AM
To: Syeda, Asma <ASyeda@aamva.org>
Cc: Mina Peters, AK Dept. of Administration <mina.peters@alaska.gov>; Singaraju, Sruti <ssingaraju@aamva.org>; Holenarsipura, Subramanya <SHolenarsipura@aamva.org>
Subject: RE: AI-SPEXS 6.0 Baseline Structured test plan - FP-Driver D

This is another fix. The problems with error responses may be a little more involved than the CSOR problem. I will see if I can resolve it fist so hopefully we can wrap up Driver C today. I'll let you know hopefully within the hour.

Gary,

D4 sent, error received.

But GPROST was sent as '02', I was expecting '01:

Value	Meaning/Description
*** ALL APPLICATIONS ***	
'00'	Processing successful
*** MOST APPLICATIONS ***	
* (all applications except 02, 05 & 12) *	
'01'	Processing unsuccessful
*** CDLIS (02) and SPEXS (37) ***	
'01'	Logic error
	(i.e. record not found or data look up error)
'02'	System error
	(i.e. file off-line)
'03'	Syntax error
	(i.e. element required, content or cross check)
'04'	Security Exception
	(i.e. authentication or authorization error)
'05'	
	Confirmation of new SOR, but DHR not ready
'06'	
	Message sent outside of CDLIS processing window
'07'	

Can you please look.

Thanks,
Asma

Subject: RE: AI-SPEXS 6.0 Baseline Structured test plan - FP-Driver D

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

Gary,

D4 sent, error received.

But GPROST was sent as '02', I was expecting '01:

Value	Meaning/Description
*** ALL APPLICATIONS ***	
'00'	Processing successful
*** MOST APPLICATIONS ***	
* (all applications except 02, 05 & 12) *	
'01'	Processing unsuccessful
*** CDLIS (02) and SPEXS (37) ***	
'01'	Logic error
	(i.e. record not found or data look up error)
'02'	System error
	(i.e. file off-line)
'03'	Syntax error
	(i.e. element required, content or cross check)
'04'	Security Exception
	(i.e. authentication or authorization error)
'05'	
	Confirmation of new SOR, but DHR not ready
'06'	
	Message sent outside of CDLIS processing window
'07'	

Can you please look.

Thanks,
Asma

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

Subject: RE: AI-SPEXS 6.0 Baseline Structured test plan - FP-Driver D

Gary,

The HB was sent with NCB Error as 'N' , and without the error "REQUESTED RECORD NOT FOUND".

Hence, had common validation errors :

ERROR BLOCK OUT	1	9999 99NAME REQUIRED
ERROR BLOCK OUT	4	9999 99DRIVER LICENSE NUMBER REQUIRED
ERROR BLOCK OUT	2	9999 99DOB REQUIRED
ERROR BLOCK OUT	5	
ERROR BLOCK OUT	3	9999 99STATE CODE REQUIRED

Can you please look.

Thanks,
Asma

Subject: RE: AI-SPEXS 6.0 Baseline Structured test plan - FP-Driver D

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

Yes, this is the same general problem I am resolving for Driver C. Hopefully I will have a fix deployed shortly.

Gary,

I was expecting # D2 in error "DUPLICATE CONVICTION", but received '9999 99TE CONVICTION'.

Can you please look.

Thanks,
Asma

Subject: RE: AI-SPEXS 6.0 Baseline Structured test plan - FP-Driver D

Gary,

The error and the Processing Status is fine for # D19.

But, the HG message is error should have the other elements populated as per the following section in the Master Specification:

CD03.3.3.4 Transmission of State Request for Status (SG), Status Response (HG) Message with Errors:

CD03.HG.TRN.ERR.0200	Driver Mailing Address (DDVADD)	CLMF-DRVHIST-MAILING-ADDR Format=Alpha-numeric Size=71	Set to '@@@@'	1-1
CD03.HG.TRN.ERR.0300	Driver License Number of Permits (DDLNMP)	CLMF-NUMB-PERMITS Format=Alpha-numeric Size=1	Set to '0'	1-1

Document ID: 0.7.1187.19324 DMV00050867

CD03.HG.TRN.ERR.0400	Driver License Commercial Class Code (DDLCL2)	CLMF-DESC-CDL-CLASS Format=Alpha-numeric Size=3	Set to blanks	1-1
CD03.HG.TRN.ERR.0500	Driver License Non-Commercial Class Code (DDLCL3)	CLMF-DESC-NON-CDL-CLASS Format=Alpha-numeric Size=3	Set to blanks	1-1
CD03.HG.TRN.ERR.0600	Driver License Non-Commercial Status (DDLNTS)	CLMF-DESC-NON-CDL-STATUS Format=Alpha-numeric Size=3	Set to blanks	1-1
CD03.HG.TRN.ERR.0700	Driver License Commercial Status (DDLCTS)	CLMF-DESC-CDL-STATUS Format=Alpha-numeric Size=3	Set to blanks	1-1
CD03.HG.TRN.ERR.0800	Number of Driver License Restrictions (DDLNMR)	CLMF-NUMB-DL-RESTR Format=Alpha-numeric Size=2	Set to '00'	1-1

Gary,

D4 sent, error received.

But GPROST was sent as '02', I was expecting '01:

Value	Meaning/Description
*** ALL APPLICATIONS ***	
'00'	Processing successful
*** MOST APPLICATIONS ***	
* (all applications except 02, 05 & 12) *	
'01'	Processing unsuccessful
*** CDLIS (02) and SPEXS (37) ***	
'01'	Logic error
	(i.e. record not found or data look up error)
'02'	System error
	(i.e. file off-line)
'03'	Syntax error
	(i.e. element required, content or cross check)
'04'	Security Exception
	(i.e. authentication or authorization error)
'05'	
	Confirmation of new SOR, but DHR not ready
'06'	
	Message sent outside of CDLIS processing window
'07'	

Can you please look.

Thanks,
Asma

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

Subject: RE: AI-SPEXS 6.0 Baseline Structured test plan - FP-Driver D

That will require a fix, although it should be a relatively quick redeployment.

What are the other loose ends that we can try? I believe you wanted to verify hazmat threat determination on Driver A and K and also check the accident locator reference on Driver E. Those are ready. Anything else?

Gary,

The error and the Processing Status is fine for # D19.

But, the HG message is error should have the other elements populated as per the following section in the Master Specification:

CD03.3.3.4 Transmission of State Request for Status (SG), Status Response (HG) Message with Errors:

CD03.HG.TRN.ERR.0200	Driver Mailing Address (DDVADD)	CLMF-DRVHIST-MAILING-ADDR Format=Alpha-numeric Size=71	Set to '@@@@'	1-1
CD03.HG.TRN.ERR.0300	Driver License Number of Permits (DDLNMP)	CLMF-NUMB-PERMITS Format=Alpha-numeric Size=1	Set to '0'	1-1

CD03.HG.TRN.ERR.0400	Driver License Commercial Class Code (DDLCL2)	CLMF-DESC-CDL-CLASS Format=Alpha-numeric Size=3	Set to blanks	1-1
CD03.HG.TRN.ERR.0500	Driver License Non-Commercial Class Code (DDLCL3)	CLMF-DESC-NON-CDL-CLASS Format=Alpha-numeric Size=3	Set to blanks	1-1
CD03.HG.TRN.ERR.0600	Driver License Non-Commercial Status (DDLNTS)	CLMF-DESC-NON-CDL-STATUS Format=Alpha-numeric Size=3	Set to blanks	1-1
CD03.HG.TRN.ERR.0700	Driver License Commercial Status (DDLCTS)	CLMF-DESC-CDL-STATUS Format=Alpha-numeric Size=3	Set to blanks	1-1

Gary,

The HB was sent with NCB Error as 'N' , and without the error "REQUESTED RECORD NOT FOUND".

Hence, had common validation errors :

ERROR BLOCK OUT	1	9999 99NAME REQUIRED
ERROR BLOCK OUT	4	9999 99DRIVER LICENSE NUMBER REQUIRED
ERROR BLOCK OUT	2	9999 99DOB REQUIRED
ERROR BLOCK OUT	5	
ERROR BLOCK OUT	3	9999 99STATE CODE REQUIRED

Can you please look.

Thanks,
Asma

Subject: RE: AI-SPEXS 6.0 Baseline Structured test plan - FP-Driver D

This is another fix. The problems with error responses may be a little more involved than the CSOR problem. I will see if I can resolve it fist so hopefully we can wrap up Driver C today. I'll let you know hopefully within the hour.

Document ID: 0.7.1187.19326 DMV00050906

Gary,

D4 sent, error received.

But GPROST was sent as '02', I was expecting '01:

Value	Meaning/Description
*** ALL APPLICATIONS ***	
'00'	Processing successful
*** MOST APPLICATIONS ***	
* (all applications except 02, 05 & 12) *	
'01'	Processing unsuccessful
*** CDLIS (02) and SPEXS (37) ***	
'01'	Logic error
	(i.e. record not found or data look up error)
'02'	System error
	(i.e. file off-line)
'03'	Syntax error
	(i.e. element required, content or cross check)
'04'	Security Exception
	(i.e. authentication or authorization error)
'05'	
	Confirmation of new SOR, but DHR not ready
'06'	
	Message sent outside of CDLIS processing window
'07'	

Can you please look.

Thanks,
Asma

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

Gary,

For Driver N, I was sending the wrong DLN, instead of AI sending the SB/HB in error ""REQUESTED RECORD NOT FOUND" I was not receiving any response, (I have attached the email for your reference)

Other than this, you have pretty much covered everything.

Shall we start Driver A and K fix for Hazmat ?

Thanks,
Asma

Subject: RE: AI-SPEXS 6.0 Baseline Structured test plan - FP-Driver D

That will require a fix, although it should be a relatively quick redeployment.

What are the other loose ends that we can try? I believe you wanted to verify hazmat threat determination on Driver A and K and also check the accident locator reference on Driver E. Those are ready. Anything else?

Gary,

The error and the Processing Status is fine for # D19.

But, the HG message is error should have the other elements populated as per the following section in the Master Specification:

CD03.3.3.4 Transmission of State Request for Status (SG), Status Response (HG) Message with Errors:

CD03.HG.TRN.ERR.0200	Driver Mailing Address (DDVADD)	CLMF-DRVHIST-MAILING-ADDR Format=Alpha-numeric Size=71	Set to '@@@@'	1-1

Gary,

The HB was sent with NCB Error as 'N' , and without the error "REQUESTED RECORD NOT FOUND".

Hence, had common validation errors :

ERROR BLOCK OUT	1	9999 99NAME REQUIRED
ERROR BLOCK OUT	4	9999 99DRIVER LICENSE NUMBER REQUIRED
ERROR BLOCK OUT	2	9999 99DOB REQUIRED
ERROR BLOCK OUT	5	
ERROR BLOCK OUT	3	9999 99STATE CODE REQUIRED

Can you please look.

Thanks,
Asma

Siri, we left off at D2 and can continue when you're ready.

We also have not finished Driver C. I believe we left off at C12 if you'd rather pick up from there.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

Yes, I would have expected an error response to be generated. Apparently there is some level of message parsing for logging purposes prior to request processing. I will pursue this as a fix.

Gary,

I sent the correct DLN, and received the responses.

For the initial try, since there was no pointer with DLN 'A7685517' in AI , shouldn't the error be "REQUESTED RECORD NOT FOUND" ?

ID	Clear Name and Identifier	Implementation Name	SOR Action on Data
CD04.LKUP.SB.0100	Driver License Number (DDLNUM)	CLMF-CODE-DLN-CURR Format=Alpha-numeric Size=25	SOR attempts to locate the r using the DDLNUM contain message. If the record is no error message.

Gary,
For ACD Code B27, you need the withdrawal.

For the 1st conviction, the Withdrawal should be no less than 180 days or more than 1 year:

Table 15. Violating Out-of-Servi

FMCSR	FMCSR Description	ACD Code	
Violating Out-of-Serv			
1st conviction = no less than 180 days or more than 1 yr 1st conviction w/hazmat or in vehicle designed to transport 16+ passenger = no less thar 2nd conviction w/in 10 yr = no less than 2 yrs or more than 5 yrs 2nd conviction w/hazmat or in vehicle designed to transport 16+ passenger = no less tha 3rd conviction w/in 10 yr (no distinction for hazmat or number of passengers) = no less *NOTEs: disqualification period must be in addition to any other previous period of dis* *Only applicable when offense occurred in a CMV)* For 1st conviction – ACD Code of withdrawal is same as ACD Code of conviction; Retention Period: 15 years from the conviction date or for as long as any resulting with

Gary,

Since the responses came after 50 secs, the test case at my end timed out, can you look why there was a delay?

Can I send # N3?

Good morning, Nadeem,

I have just tested this scenario myself in the current AK environment, and verified that SSA is returning the code "2" in UNI, which Monica's program is correctly interpreting. Here is the mainframe UNI response. So it is SSA that is sending the wrong response.

Monica,

Please revisit test case #009. Your system is responding with an SSOLV Verification Response of 2. The expected results should be a SSOLV Verification Response of 6 - "SSN, Name, and DOB match; SSA records indicate person is deceased".

Please let me know if you have any questions.

Thank you,
Nadeem

To: Syeda, Asma
Cc: Peters, Mina L (DOA); Singaraju, Sruti
Subject: RE: AI-SPEXS 6.0 Baseline Structured test plan - FP-Driver D

Sure, let's start with Driver A and K.

On the Driver N issue, the tests we ran this morning for Driver D verifies we are able to response with a "REQUESTED RECORD NOT FOUND" when non-numeric characters are in the license number, which is what I thought was causing the problem. However, using the internally logged request, I was unable to reproduce the application exception. I believe there may have been some other corruption of the message besides the DLN, such as binary data, etc, that was lost when we logged it. Maybe we will be able to reproduce the exception.

Gary,

For Driver N, I was sending the wrong DLN, instead of AI sending the SB/HB in error ""REQUESTED RECORD NOT FOUND" I was not receiving any response, (I have attached the email for your reference)

Other than this, you have pretty much covered everything.

Shall we start Driver A and K fix for Hazmat ?

Thanks,
Asma

From: Gary Tancik [mailto:Gtancik@resdat.com]
Sent: Wednesday, August 9, 2017 10:27 AM
To: Syeda, Asma <ASyeda@aamva.org>

Subject: RE: AI-SPEXS 6.0 Baseline Structured test plan - FP-Driver D

That will require a fix, although it should be a relatively quick redeployment.

What are the other loose ends that we can try? I believe you wanted to verify hazmat threat determination on Driver A and K and also check the accident locator reference on Driver E. Those are ready. Anything else?

Gary,

With the weekly DB Refresh, pointer was deleted.

Can you please add the pointer back, so I can send the UD message.

Thanks,
Asma

Gary,

D4 sent, error received.

But GPROST was sent as '02', I was expecting '01:

Value	Meaning/Description
*** ALL APPLICATIONS ***	
'00'	Processing successful
*** MOST APPLICATIONS ***	
* (all applications except 02, 05 & 12) *	
'01'	Processing unsuccessful
*** CDLIS (02) and SPEXS (37) ***	
'01'	Logic error
	(i.e. record not found or data look up error)
'02'	System error
	(i.e. file off-line)
'03'	Syntax error
	(i.e. element required, content or cross check)
'04'	Security Exception
	(i.e. authentication or authorization error)
'05'	
	Confirmation of new SOR, but DHR not ready
'06'	
	Message sent outside of CDLIS processing window
'07'	

Can you please look.

Thanks,
Asma

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

Gary,

I was expecting # D2 in error “DUPLICATE CONVICTION”, but received ‘9999 99TE CONVICTION’.

Can you please look.

Thanks,
Asma

Received the responses for #D1, can I send # D2?

Thanks,
Asma

Gary,

Let me know when Driver D is added.

Thanks,
Asma Syeda, CSM
